# PREPARING FOR YOUR SPRAY TAN

For the best Results we ask that you exfoliate and wax 48 hours and shave 24 hours before your spray tan.

After your spray you should wait 24 hours to shower with a warm water rinse only. It is very important that you moisturize daily after you shower.

After your spray, you do NOT want to do anything to get wet or sweat. Be sure to wear loose fitted clothing to your appointment. Your color will keep enhancing for 24 hours.

## **Venetian One Hour:**

Allows you to do a warm water rinse in 1 to 3 hours (depending on your skin type) instead of waiting 24 hours. Your color will still keep enhancing for 24 hours

## **Venetian Plus:**

is the darkest Norvell color

## **Blackout:**

For body building competitions, includes 3 days (Thursday, Friday and Saturday) of Spray tans.

## **Cocktail:**

A 3-5 minute session in a stand up tanning bed for a combination of heat, air and UV light to activate DHA, enhancing your color and aiding in the drying process.

## **X La Gel:**

A packet of gel to apply before your spray tan that helps to balance your pH and prep your skin for your spray tan.

## **Exmitt:**

Used to exfoliate your skin before your spray tan. Great for someone coming from work that may have on lotion or deodorant.

## **Norvell Maintenance Kit:**

Contains everything you need to maintain that perfect sun-kissed color!
