

How To Roll Your NWU Sleeves

The sleeves of the NWU's may be rolled up during times of warm weather.

For the NWU, the sleeves will be rolled inside out, with the cuff folded over, forming a roll approximately 3" wide and ending at a point approximately 2" above the elbow.

1. Lay the uniform on a flat surface, face up and sleeves extended out, with the button at the end of the sleeve unbuttoned.
2. Flip the sleeves inside-out by folding the cuffs of the sleeve up towards the armpit area. Pull it up until it almost touches the inside seam of the armpit region.
3. Roll the bottoms of the inside-out sleeves in 3" rolls upwards until you reach the cuffs.
4. Fold the end of the cuff down over the rolled portion of the sleeve.
5. Secure the button and flap. Repeat on opposite sleeve.
