

I want to address what I feel are failures of this township board

First you did not hold a published public meeting about the change of use of property on Baseline, stating future use was commercial, when you don't in your zoning book show where your separate divisions of property rezoning are, they are not on your map. A special use permit was brought in front of the planning commission and again no published public notice given.

2nd You have allowed an atrocious building to mar the rural feel of the township by allowing such a large structure. Again not in line with the township rural feel.

3rd You allowed an out building to be classified as agricultural when it houses commercially licensed equipment, making it commercial thereby needing a permit, which was never acquired before building. Resulting in both residential and commercial to occupy the same property which you don't have the zoning laws to approve without a proper public notification of said meeting.

I have also notified the prosecuting attorney about failure to allow the residents of this township proper open meetings being held by this board. I myself was told not to come to a meeting since only bills were going to be paid but in the following minutes it appears a planning commission spot was sworn in. I also have proof of one date on the township board and the meeting was actually held the day before.

As for the way permits are handled there is no even and fair being done. One person adding a roof over a porch needs a permit and yet others are allowed to add whole additions without ever applying for a permit.

This townships residents deserve to have open communication when it comes to the development of its township.
