## **Puzzle Description:**

This Oak Wood Slide Box is also known of as the Stickman No. 1 Puzzle. It was the first puzzle designed by artist Robert Yarger. These were limited in edition to just 100 puzzles, but the last 15 copies were not produced until now.

As the first Stickman design, this box is relatively simple to solve, requiring a minimum of only 7 steps to open its 3 hidden compartments. The puzzle was crafted as close as possible (from memory) to the original 85 boxes that preceded it long ago. As such, it is bulky, rustic, and crafted from ordinary white oak. This might not appeal to those collectors more used to the modernly complex and ornate Stickman designs. Still, it is highly collectable, which is why a formal impartial online random drawing for them was implemented.
