JOURNAL OF MANUFACTURING TECHNOLOGY & RESEARCH

(An International Journal)

(ISSN No. 0973-0281) Published biannually since 2005

AIMS AND SCOPE

Manufacturing technology & Research is a peer reviewed International Journal, which aims to publish high quality original papers. These should encompass the best fundamental and applied science with an emphasis on their application to the finest engineering practice. The scope includes all aspects of science, technology and engineering, which have relevance to manufacturing. Technology and Industrial Systems.

The Journal also features: Special Issues of Conference.

Copyright and Originality

It is a condition of Publication that manuscripts submitted to this journal have not been published and will not be simultaneously submitted or published elsewhere. All authors must sign the Transfer of Copyright Agreement, available from the editor, before the article can be published. This transfer agreement enables us to protect the copyrighted material for the authors, but does not relinquish the authors, proprietary rights or rights to use their work as they please in the future. The copyright transfer covers the exclusive rights to reproduce and distribute the article, including reprints, photographic reproductions, microform or any other similar reproductions of similar nature and translations.

Nomenclature

All mathematical symbols and Greek letters may be typewritten as far as possible, with identification provide in the margin. Distinction should be made between capital and lower case letters; between the letter O and zero; between the letter I, the number 1, and prime; between k and kappa. Mathematical expression should be formatted in a column width of 55 characters. Mathematical expressions will be typeset exactly flush with the right margin. Number that identifies mathematical expression should be enclosed parentheses.

References

References should be typed doubled-spaced, arranged in numerical order as given in the text and on a separate sheet. Journal references should be given

in the following order; author, article title (with subtitle, if any), journal abbreviation, volume number in Arabic numerals, inclusive pages and year. If the paper has been seen only in abstract, this should be indicated at the end of the original reference by the addition of abbreviation (Abstr.), followed by the name, volume, pages and year of abstract journal. The order for the book references is as follows: author title, volume (if more than one), edition number (if other than the first), city, publisher and year. If the reference is a chapter in a book, the order changed as follows: author of the chapter, title of the chapter, "In," book title, volume, edition, editors, city, publisher, year, and inclusive pages of the chapter. See the following examples:

Journal Article: Author's Name, "Article title", Journal Name, Volume, Number of Issue, Year, Page Number

Jha A.K. , Kumar S. " A Computer Simulation Technique to Estimate Die Load and Energy During Sinter – Forging Process" IE(I)journal-PR, Vol.83,2002, pp.27-33

Books: Authors Name, "Book Title", Vol., Edition, Publisher's Name, Year, Page Number

Surender Kumar, S.K. Mukherjee, Vinay Sharma" IT Based Manufacturing" 2002, Narosa Publishing House, pp.23-45

Reference should be referred to by numbers in text, and be listed in numerical order at the end of the paper. Authors are responsible for bibliographic accuracy and must check every reference in the manuscript and proof read again in Page proof.

Tables

Tables should be numbered consecutively with Arabic numbers in order of appearance in the text. Also type each table double-spaced on a separate sheet. Do not use vertical rules. Supply short descriptive title above the tables.

Figures

Must be camera-ready specified, Original & three copies of figures must be accompany the manuscripts. Line drawings should not larger than 22 by 28 cm (8 1/2 X 11-in.) and should be planned for reduction to column width. Lettering should be large enough to be clearly legible when the illustration is reduced. Photographs of equipment or test specimens must glossy prints and should be used sparingly. Captions for figures should be typed doubled-spaced and as the last page of manuscripts. Halftones should be submitted as glossy prints. Authors will be charged for color reproductions. Each figure

should be clearly identified on the back with the author's name(s) and figure number. The top of the figure should also be labeled. Artwork will be returned to the author after publication.

Proofs

Unless otherwise, specified, page proofs will be sent to the first-named author for correction through Email. Proofs should be returned within 72 hours of receipt. Any alterations not of a typographical nature may be charged to the author.

Submission of Papers:

The papers must be submitted to the Manufacturing technology & Research is a peer reviewed International Journal, electronically through the email to dangayach@gmail.com, skumar@iurisd.org. The manuscript must be accompanied by a signed statement that it has been neither published nor currently submitted for publication elsewhere. The manuscript should be written in English and a minimum standard of the proficiency in the English language should be met before submission to the editorial office. Email notification to the author for each process stage.

It is important that authors provide functioning email address and functioning mobile number of the first author correctly because all communication will occur on those email address and/or mobile number.

Details of the paper (Title, Abstract, Keywords, Author Name(s), Designation(s), Organization Name(s)) must be same as mentioned in the research paper which you are submitting.

Publication charge

There is no publication charge.

Topics cover Include

JMTR is an open access international journal that provides rapid publication original work of research articles in all areas of Mechanical, Production and Industrial Engineering and its applications. We invite researchers to contribute their original research articles as well as review articles that will stimulate the continuing efforts to understand the mechanism underlying production technology, Manufacturing Processes, Design and Materials, Robotics and Automation, Rapid Prototyping and Manufacturing, sustainable Manufacturing, Mechatronics, Nanotechnology, Micro electro-mechanical systems (MEMS), Tribology, state-of-the-art reviews, and high quality technical notes are invited for publications and the evaluation of outcomes.

Submission of Manuscripts

The manuscripts should be prepared in English. It should be submitted in the final form of editor. Font type (Times New /roman) and font size (12). The length of the paper should not exceed ten standard size pages (i.e. A4 size 210 x 297 mm). All manuscripts must use SI (metric) units in text, figures and table. Manuscripts typed in doubled-spaced in single column soft copy through email and should be mailed to:
