Garden Spot Newsletter

October 2014

Fellow Members of the Gardens of Gulf Cove,

Over the past three years (2012, 2013, 2014) the annual property owner's assessment has been held steady at \$302.50. During this stretch, the Board relied upon strong budget management by the CAM and the staff, two special assessments for major projects and on a steadily increasing tide of funds coming from strong work by our lawyers and staff to collect past due assessments and fines. As the Board presents the 2015 budget adopted on September 10th, we are faced with the necessity of raising the annual assessment to meet specific challenges in our community.

Over the past three years our management team and the law firm have returned to us \$216,836.00 in past due assessments and reduced our in arrears account to less than \$76,000. These collections of in arrears debts enabled us to meet the challenges of significant deferred maintenance problems and the ongoing challenges of very old systems and buildings without seeking substantial increases in the annual assessment. Please note, if the Board had raised the annual assessment by 10% each of the past three years as allowed by our governing documents, the annual assessment for 2015 would be \$402.63!

These back fees and fines accounts are no longer available as we have whittled down the delinquent property list in the Gardens and because the law on recapturing obligations from property owned by banks has been redefined by the courts and now operate against us in substantial ways. We do anticipate that there will be some more sales in the community but the funds coming to us in those sales will be quite small.

Alternative resources are no longer reliable and we present to you a budget for 2015 that includes projects that we believe are absolutely necessary to move the Gardens of Gulf Cove into the future on firm financial ground. The assessment to meet these challenges will provide a tight budget but one that can be managed with the same diligence that the staff and Board have demonstrated in the past several years. The Board of Directors strongly encourages your support of the assessment increase of fifty-five dollars (\$55.00) to provide financial stability for the Gardens of Gulf Cove Property Owners Association into the immediate future. The proposed annual assessment will be \$357.50.

We thank you for your ongoing support of the Gardens of Gulf Cove community.

Respectfully submitted,

John W. Anderson
President of the Board

Charlotte County Utilities
Water Restrictions & Conservation
Year-Round Water Conservation Measures

The District's year-round water conservation measures went back into effect August 1, 2013. Charlotte County Ordinance 2010-016 adopted the water management district's year-round water conservation measures. Below are the current water conservation measures in place in Charlotte County. Always refer to your city or county regulations first.

Lawn Watering Days and Times

Lawn watering is limited to twice per week (if needed). Lawn watering days and times are as follows unless your city or county has a different schedule or stricter hours in effect:

(Based on the last number in your service address)

Even number addresses may water on Thurs and /or Sun - before 10 a.m. or after 4 p.m.

Odd number addresses may water on Wed and/or Sat - before 10 a.m. and after 4 p.m.

Hand watering and micro-irrigation of plants (other than lawns) may be done on any day and any time.

New Lawns and Plants (30 / 30)

New lawns and plants have a "30-30" establishment period. On day of installation, watering is allowed on any day at any time. During the first 30 days, watering is allowed on any day, however during the allowable hours (before 10 a.m. and after 4 p.m.). During the second 30 days, watering is allowed three days per week: even-numbered addresses may water on Tuesday, Thursday and Sunday; odd-numbered addresses may water Monday, Wednesday and Saturday; and locations without a discernable address may water on Tuesday, Friday and Sunday.

Reclaimed Water

Reclaimed water remains subject to voluntary watering hours, unless blended with another water source or restricted by the local government or utility.

Fountains, Car Washing and Pressure Washing

There are no specific restrictions on fountains, car washing and pressure washing.

These and other water uses should be conducted as efficiently as possible, such as using a shutoff nozzle on each hose to adhere to the general restriction prohibiting wasteful water usage.

If you have additional water restriction questions, please contact SWFWMD by email at Water.Restrictions@WaterMatters.org or by calling their Water Restrictions Hotline at 1.800.848.0499 anytime or 1.800.836.0797, ext. 2298 during business hours (Florida only).

Things to look for in your lawn maintenance company

Do they ...

- Display the required BMP Training Certification Decal on their equipment? (required after September 18, 2008).
- Use a minimum 50% slow-release nitrogen fertilizer product?
- Apply no more than the maximum allowable amounts of nitrogen and phosphorus?
- Use a deflector shield on all broadcast fertilizer spreaders?
- Remove grass clippings from the roadway, storm drains, and ditches?
- Promote the benefits of a low maintenance zone around water bodies?
- Maintain a 10' fertilizer-free zone around water bodies and wetlands, or three feet with a deflector?
- Refrain from applying nitrogen and phosphorus from June 1st-September 30th?

What you need to know about

Charlotte County's Fertilizer Ordinance

Ordinance No. 2011-017

The Charlotte County Fertilizer Ordinance was written in 2008 to allow for maintaining healthy landscapes while still keeping our water clean. The Ordinance was amended in 2011 with two important changes:

- No fertilizer containing nitrogen or phosphorus may be applied from June 1st to September 30th (Restricted Season) to turf or landscape plants.
- Additionally there is now a limit of no more than 4 pounds of actual nitrogen per 1,000 square feet per year total.

For more information on the Fertilizer Ordinance, and how you can maintain your yard as a Florida-Friendly landscape, please visit our website at <http://charlotte.ifas.edu/horticulture/hort-fertilizer1.htm>.

Phosphorus Applications

Shall not exceed 0.25 pounds per 1,000 square feet at each application, and shall not exceed a total of 0.5 pounds per 1,000 square feet per year.

Nitrogen Applications

Nitrogen fertilizer must contain at least 50% slow-release nitrogen. Calculate your fertilizer needs so that you apply 1 pound of actual N per 1,000 square feet per application.

Deflector Shields

If fertilizing within 3-10 feet from a water body or wetland, a deflector shield must be used on all broadcast spreaders. Fertilizer may not be applied within three feet of the water body or wetland.

Grass Clippings

No grass clippings, vegetative material, or vegetative debris may be deposited in stormwater drains, ditches, conveyances, water bodies, or roadways.

Low-Maintenance Zone

A 6-foot low maintenance zone of landscape plants appropriate to preventing fertilizer runoff is recommended for any water body or wetland.

Fertilizer-Free Zone

Fertilizer may not be applied within 10 feet of any water body or wetland (or 3 feet if a deflector shield is used). No fertilizer may be applied to impervious (non-porous) surfaces, and any spillage must be removed.

Commercial Fertilizer Applicators

All applicators of fertilizer (except homeowners on their own property) must receive training and certification in a Charlotte County-approved Best Management Practices (BMP) training program.

Contact Charlotte County Extension Service (941.764.4340) for training opportunities.

<http://charlotte.ifas.ufl.edu>

Enforcement

Enforcement actions will take place through the use of county code enforcement procedures or civil penalties.

This Ordinance applies to both homeowners and those who apply fertilizer commercially within unincorporated Charlotte County.

Restricted Season

No fertilizer containing nitrogen or phosphorus may be applied from June 1st to September 30th (Restricted Season) to turf or landscape plants.

The image shows a fertilizer bag on the left and a 'GUARANTEED ANALYSIS' chart on the right. The bag is labeled 'FERTILIZER' and '14-0-26'. Arrows point from the numbers to their respective components: 'Nitrogen N' for 14, 'Phosphate P₂O₅' for 0, and 'Potash K₂O' for 26. The analysis chart lists various nutrients and their percentages, with some values circled in green.
