

You must **create a product** that demonstrates your understanding of the following big ideas. After I review your product, you will **explain** these ideas in an interview.

Assessment categories:

Content:

1. Name a **single-celled** organism and describe how they make more of themselves.
2. Name a **multi-celled** organism and describe how they make more of themselves.
3. Draw or make a model of a cell. (Include the following parts: **nucleus, genes, chromosomes.**)
4. Explain the following:
 - a. which part of your cell is basically your traits
 - b. where **your** traits came from

POP:

1. Product quality reflective of the time spent on it (complete, clear, easy to read/hear, proper English conventions). (3-points scale)
