Introduction

The North Central Trauma Advisory Council (NCRTAC) is an integral part of the Wisconsin Trauma Care System. Since NCRTAC commencement in 2001, members and key partners have collaborated to improve the care of trauma patients across the continuum of care, in the region and Wisconsin. NCRTAC primarily partners with hospitals and emergency medical services. Additionally, the NCRTAC partners with local public health departments, public safety entities, educational institution, emergency management, and the local Healthcare Emergency Readiness Coalition (HERC).

The NCRTAC also assists with carrying out the Wisconsin Statewide Trauma Advisory Council's mission of reducing death and disability resulting from traumatic injuries and mass casualty events by providing a comprehensive and integrated system of care. NCRTAC will continue to foster the development and improvement of local, regional, and statewide efforts of the Wisconsin Trauma Care System.

Mission

The North Central Regional Trauma Advisory Council is dedicated to reducing the death, disability and suffering that result from traumatic injuries and mass casualty events by providing a comprehensive and integrated system of regional prevention and trauma care resources throughout the continuum of care.

- adapted from Wisconsin Trauma Care System Mission Statement

Demographics

- The NCRTAC is made up of:
- 12 counties
- 12,069 square miles
- 466,477 citizens#
- 62 medical first responder (non-transport) agencies (Attachment 1)
- 57 transporting ambulance services (Attachment 1)
- 15 designated trauma care facilities (Attachment 2)
- 2 undesignated hospitals (Attachment 2)

According to Wisconsin Trauma Registry data*, trauma care in our region for the calendar year 2021 included:

- 5,603 trauma patients entered into the Registry
- 700 patients under age 19 (12.5%)
- 2,817 hospital admissions (50.3%)
- 469 intensive care unit admissions (16.6% of admissions)
- 816 transferred to another hospital (14.6%)
- Top injury mechanisms of injury (category)
 - Slipping, tripping, stumbling and falls 53.52%
 - o Car occupant injured in transport accident 13.69%
 - Other land transport accidents 12.05%

^{# 2020} Population estimate US Census (American Community Survey)

Exposure to inanimate mechanical forces - 5.30%

Executive Council

The Executive Council of the NCRTAC is responsible for setting the direction of the RTAC and monitoring the work of the committees.

The NCRTAC Bylaws – Article IV, Section I states:

The Executive Council shall consist of not less than nine (9) or more than seventeen (17) Directors including:

- a) Not less than 2 prehospital affiliated members.
- b) Not less than 2 hospital affiliated members.
- c) At least one member representing education
- d) At least one member representing injury prevention
- e) Not less than 2 miscellaneous members (e.g. public health, law enforcement, education, elected officials, emergency management, concerned citizens, etc.)

Article IV, Sections V and VI require the Executive Council to meet at least four times per fiscal year.

Coordinating Facility and Resource Hospital

Aspirus Wausau Hospital, an American College of Surgeons verified level II trauma center, and Marshfield Medical Center, an American College of Surgeons verified level II adult and pediatric trauma center currently serve as the NCRTAC Co-Coordinating Facilities.

General Meetings

General membership meetings are held bi-monthly, generally on the third Thursday of odd months. Meeting locations rotate between Aspirus Wausau Hospital and Marshfield Medical Center. Teleconference attendance is available. Meetings run from 9:00 a.m. to Noon and consist of a general membership meeting and committee meetings. Executive Council meetings may be held during this time as needed. General meetings include updates from portions of the trauma system including State Trauma Advisory Council & committee meeting summaries, DHS trauma and EMS updates, NCW HERC highlights, member information sharing and group projects. Educational presentations or guest presentations also may be held during this time.

Agenda items may be requested through either the RTAC Coordinator or the Executive Council Chair.

^{*} Some counts may include patients counted twice when referred to another facility

Standing Committees

Performance Improvement Committee

Recent accomplishments/ projects

- Requested and reviewed regional trauma data sourced both from the state trauma registry data manager and the RTAC Coordinator access to regional reports
- Compared activation criteria across multiple hospitals to analyze if they meet current standards
- Conducted regional case reviews at the General Membership meetings

Future goals

- Increase committee participation in PI
- Facilitate additional trauma registry or PI training
- Continue to review and analyze registry data
- Facilitate hospital staff training opportunities
- Create an action plan to decrease the ED LOS >3 hrs with ISS >15

Injury Prevention Committee

Recent accomplishments/projects

- Development of ATV and farm safety displays for use by RTAC members
- Monitoring of a fall prevention referral "app" for use by EMS providers
- Placement of eight Life-vest loaner stations around the region
- Distribution of personal first aid kits, distracted driver awareness items and ATV safety child activity booklets

Future goals

- Strengthen committee participation
- Review of injury data to identify additional areas of need
- Develop partnerships with other agencies performing injury prevention in the region

Out of Hospital Committee

Recent accomplishments/projects

- Support of the Stop the Bleed lay person training and hemorrhage control kit supply campaign
- Radio report and hand-off report template (MIST) distribution and education (Attachment 12)
- Tourniquet distribution and training
- SALT Triage product distribution and training
- Support of PHTLS program through the purchase of textbooks, payment of instructor update fees and offering PHTLS course host payments
- Helicopter EMS position statement
- Attendance of the RTAC Coordinator at county EMS/Fire leadership meetings

Future goals

Increase EMS participation

- Service-based education
- Develop regional MCI, patient tracking and special event planning procedures. This may be an extension of programs offered at the state level
- Review and re-promote MIST method of patient care reporting
- Education providers on updated trauma field triage guidelines

Definitive Care Committee

The Definitive Care Committee is charged with developing protocols, guidelines, and position statements to facilitate the assessment, treatment, and transport of all trauma patients throughout the trauma care continuum.

Position statements

- Administration of Antibiotics in Open Fracture
- Administration of Tranexamic Acid
- Spinal Motion Restriction
- Multiple Injured Family Members
- Radiology Studies
- Prehospital use of Helicopter EMS

Future goals

• Review and update existing position statements

Regional Needs Assessment

The NCRTAC conducted a regional needs assessment through several mechanisms:

- 2022 survey tool coordinated by DHS
- Discussion at Executive Council meeting 03/09/2022
- Discussion at General Membership meeting 03/17/2022
- Discussion at General Membership meeting 05/19/2022

Results of the survey and discussions were extrapolated and summarized into the following goals for 2022-2024.

Conflict resolution

- Develop a system to resolve conflicts concerning trauma care and injury prevention within the region.
- Increase physician involvement in NCRTAC General Membership meetings.

Performance improvement

- Re-new the NCRTAC PI committee as recommended in the Regional Performance Improvement Process Guidelines (approved by STAC 3/2021).
- Develop a system to review PI indicators recommended in the Guidelines.

Injury Prevention

- Strengthen participation in the committee.
- Initiate at least one regional injury prevention program. This program may be in cooperation with other regional partners involved in injury prevention.

Emergency Medical Services

- Implement the revised Field Triage Guideline. Incorporate hospital undertriage data.
- Re-establish EMS provider educational offerings.
- Develop regional MCI, patient tracking and special event planning procedures. This may be an extension of programs offered at the state level.

Hospital Classification

Improve educational and networking resources related to hospital classification.

Trauma Registry

- Improve educational and networking resources related to trauma registry including data entry and reporting.
- Increase the use of trauma registry data in NCRTAC projects and initiatives.

NCRTAC Trauma Conference

Beginning in 2016, the NCRTAC has held an annual regional trauma continuing education conference targeting all levels of EMS providers and hospital trauma nursing staff. We have also had pharmacy, trauma registry, physician, and advanced level provider attendees.

The conference is a one-day event with general and break-out tracks and trauma product and service vendors. The conference is sponsored by both hospital organizations in the regional as well at the NCW HERC. The fee for the conference in 2022 was \$35 which included the program, lunch, a give-away item, and continuing education credits.

The 2020 conference was canceled due to the COVID-19 pandemic. In 2021 the conference was held online only with the assistance of Northcentral Technical College (NTC). The 2022 conference was offered on Thursday, April 7 as in-person at NTC in Wausau and online via live streaming (Zoom). The 2022 conference had 120 attendees on-site and 87 viewing on-line. Many of the presentations are recorded and offered on-demand (without CEUs) via the NCRTAC website.

Statewide Trauma Advisory Council

The Statewide Trauma Advisory Council's vision is to ensure that all trauma patients in the state of Wisconsin receive comprehensive trauma care. Members of the Statewide Trauma Advisory Council (STAC) are dedicated to reducing the death and disability resulting from traumatic injuries and mass casualty events by providing a comprehensive and integrated system of care. The purpose of STAC is to advise and provide leadership to the Department of Health Services (DHS) on issues related to the development, operation and evaluation of the statewide trauma care system.

Per Wisconsin State Statute Chapter 15 (25), STAC consists of 13 advisory board members who are appointed by the secretary of health services, as follows.

- 1. Four physicians who represent urban and rural areas.
- 2. Two registered nurses, as defined in s. 146.40(1)(f).
- 3. Two prehospital emergency medical services providers, including one representative of a municipality.
- 4. Two representatives of a rural hospital,
- 5. Two representatives of an urban hospital.
- 6. One member of the emergency medical services board.

With all geographical areas of the state represented.

The Statewide Trauma Advisory Council meets quarterly on the first Wednesday in March, June, September, and December from 1:00pm-2:30pm. Please visit the DHS STAC webpage for more information.

Healthcare Emergency Readiness Coalition

A healthcare emergency readiness coalition (HERC) is comprised of a core group of hospitals and healthcare organizations, local and tribal public health agencies, state, regional, and local and tribal emergency management, and emergency medical services, as well as additional members. These partners collaborate for the common goal of making their communities safer, healthier, and more resilient. Wisconsin has seven regional HERCs that support communities before, during, and after disasters and other health-related crises.

The U.S. Department of Health and Human Services (HHS) Office of the Assistant Secretary for Preparedness and Response (ASPR) Hospital Preparedness Program (HPP) funds Wisconsin's HERCs. ASPR leads the country in preparing for, responding to, and recovering from the adverse health effects of emergencies and disasters. ASPR's HPP enables the health care delivery system to save lives during emergencies and disaster events that exceed the day-to-day capacity and capability of existing health and emergency response systems.

HPP is the only source of federal funding for health care delivery system readiness, intended to improve patient outcomes, minimize the need for federal and supplemental state resources during emergencies, and enable rapid recovery. HPP prepares the health care delivery system to save lives through the development of health care coalitions (HCCs). In Wisconsin, these are known as HERCs.

The overall goal of the HERC is to help Wisconsin communities prepare for, respond to, and recover from a disaster as quickly as possible. Through coordinated preparation, response, and recovery efforts, HERC members work to create a more resilient Wisconsin.

To learn more about the North Central Wisconsin HERC (NCW HERC), visit the NCW HERC website.

Regional Trauma Advisory Council Assessment Tool

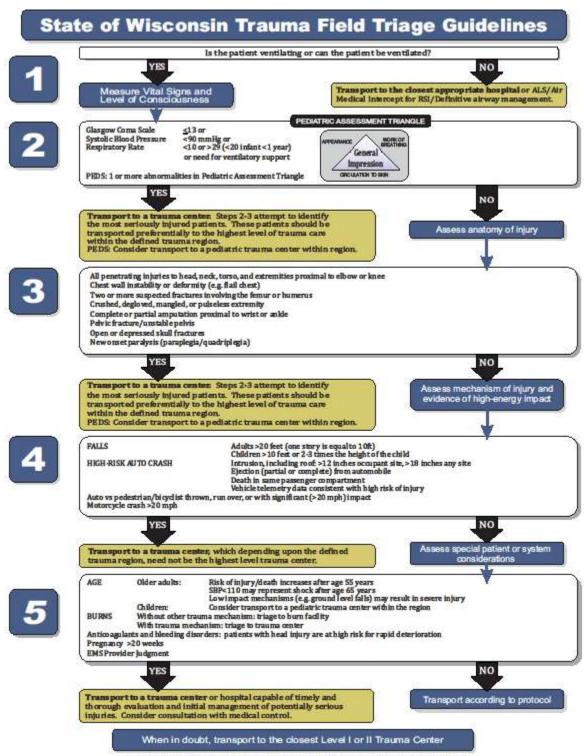

NCRTAC Self-Assessment Winter 2022

Score = Tally of surveys received from general membership. 11 surveys were initiated, of which, 8 had all questions answered.

Assessment Tool Item #	DHS Rule Reference	Indicator	2022 Score (Range 0 – 5 with 5 being best)	2019 Score (Range 0 – 5 with 5 being best)
1a.		There is well-defined regional trauma system medical oversight integrating the needs of the trauma system with the medical oversight of the overall EMS system.	2.09	3.5
1b.	118.06 (3)(f) and 118.06 (3)(g)	The RTAC will facilitate two-way communication methods between the RTAC, its members and the State Trauma Care System. This will include regular meetings.	3.91	4.57
1c.	118.06 (3)(b)	The RTAC has a functional executive council.	3.73	4.71
1d.		There is a clearly defined, cooperative, and ongoing relationship between regional trauma physician leaders and the EMS system medical directors in the region.	1.73	2.60
1e.	118.06 (3)(L)	The regional trauma plan should ensure that the number, levels, and distribution of trauma facilities are communicated to all partakers and stakeholders. The RTAC should develop procedures to ensure that trauma patients are transported to an appropriate facility that is prepared to provide care.	3.18	3.86
1f.	118.06 (3)(L)	The regional trauma plan has clearly defined the roles, resources and responsibilities of all acute care facilities treating trauma, and of facilities that provide care to specialty populations (burns, pediatrics, other).	2.36	4.00

2a.	118.06	The region has one or more coordinating	1.89	4.50
	(3)(c)	facilities that work in collaboration with the department and the RTAC to meet the needs required for the development, implementation, maintenance and evaluation of the trauma system.		
2b.		The region has a system in place to support member hospitals in the classification review process.	1.56	3.67
3.	118.06 (3)(L)	The RTAC has an up-to-date regional trauma plan based on a needs assessment and with the structure specified by the department. The plan is submitted to the department.	3.78	4.29
4a.	118.06 (3)(o)	The region has adopted the State of Wisconsin Trauma Field Triage Guidelines to ensure that trauma patients are transported to an appropriate trauma care facility. Regional over-triage and under-triage data is reviewed.	2.88	3.71
4b.		When injured patients arrive at a medical facility that cannot provide the appropriate level of definitive care, there is an organized and regularly monitored system to ensure that the patients are expeditiously transferred to the appropriate, systemdefined trauma facility.	2.75	3.57
4c.		There is a regional trauma bypass protocol that provides EMS guidance for bypassing a trauma care facility for another more appropriate trauma care facility.	2.13	3.80
4d.	118.10	Collected data from a variety of sources are used to review the appropriateness of all-inclusive regional trauma performance standards, from injury prevention through rehabilitation.	2.75	3.60
4e.	118.06 (3)(i)	The RTAC analyzes local and regional trauma registry data to identify and evaluate regional trauma care and improve the use of resources.	4.00	4.29
5a.	118.06 (3)(k)	Injury Prevention: The RTAC, in cooperation with other agencies and organizations, uses analytical tools to monitor the performance of population-based (regional) injury prevention programs.	3.50	4.29

5b.	118.06 (3)(k)	The RTAC has developed a written injury prevention plan. The injury prevention plan is data driven and targeted programs are developed based upon high injury risk areas. Specific goals with measurable objectives are incorporated into the injury prevention plan.	2.25	3.67
6a.	118.06 (3)(k)	The RTAC supports trauma training courses for all levels of healthcare providers.	4.00	4.57
6b.	118.06 (3)(k)	As new protocols and treatment approaches are instituted within the regional trauma system, structured processes are in place to inform or educate all personnel of those changes in a timely manner.	2.63	4.17
7.		There are established procedures and mechanisms for communications among trauma system members during all levels of healthcare emergencies including multiple jurisdiction incidents. The procedures and systems are effectively coordinated within the overall regional response plans.	2.50	3.60
8.		The regional trauma plan addresses the integration and participation of rehabilitation services within the continuum of care for trauma patients.	0.38	3.00
9.	118.06 (3)(k)	The RTAC has a process in place to resolve conflicts concerning trauma care and injury prevention.	0.75	2.83
10.		The RTAC is integrated into the regional healthcare coalition (HCC).	3.00	4.43

Approved by State Trauma Advisory Council & EMS Advisory Board - October 2012
