Meadows at Crystal Lake

Below is the scope of work at the above property:

Trim both sides of ficus hedge, and also trim 12 inches off the top of hedge of approximately 3665 linear feet of hedge, this will also include clean up of all leave material from hedge and cleaning out dead foliage under hedge. cost = \$4310.00 comes out to \$1.18 per linear foot.

Deep root injection and foliar spray of entire hedge with a systemic insecticide for control and prevention of white fly infestation

cost = \$2320.00 This comes out to .63 cents per linear foot. This is discounted from our regular price of \$1.00 per ft.

If you decide have to have mulch applied at a later date we can get you a competitive bid at that time as I know you needed this asap.

Please advise if you have any questions.

Thank you,
