2023 Annual Report

James A. Casey House maintained our current 51 / 3.1 LOC beds. For a large part of the year we have been running at nearly full capacity, often with waiting lists. We continue to have large percentage of successful program completions.

The ongoing dual program continues to serve many of our guys who suffer with mental health issues. By keeping psych medication management in-house, we avoid many problems with outside agencies and we are able to address any psych issues which may arise, immediately.

We continue to incorporate medication assisted treatment. We find that the vast majority of our MAT clients successfully complete treatment. In addition to buprenorphine and Vivitrol, we also accept hard-to-place clients on methadone maintenance.

New upgrades to our physical plant are in progress. We have been remodeling all client apartments and have installed new floors in our first floor lobby, dayroom, and counselor and administrative offices. We are also in the process of installing and new roof.

Upgrading and improving our physical plant is at the top of our “to do list.”

We are also ahead of the game in bringing our program in line with ASAM standards.

We are optimistic and are looking forward to continuing to serve the community in 2023 / 2024.

Joseph Sakavage, Project Director
