| Color Key |                                     |
|-----------|-------------------------------------|
|           | Peak employment year prior to 2010. |
|           | Peak employment year 2010 or later. |
|           | Growth 10% or greater.              |
|           | Decrease 10% or greater.            |

Note: "% of total peak" column sums to greater than 100% because peak employment did not occur in the same year for each industry; hence a total sum for that column is not applicable. This column is still useful in noting each industries share of total employment for the year in which peak employment did occur.

Note: Total employment at peak (5,490) is not the sum of "emp. at peak" column because peak employment did not occur in the same year for each industry; hence a total sum for that column is not applicable. 5,490 is total employment for 2008; the year total employment was at its peak.
