

Tucson Asphalt will be overlaying our roads in June and with no unforeseen issues, such as weather, the paving is scheduled to take place between:

**Road Overlay Project: June 2 and June 10, 2020.**

During the operation a "designated area" will be closed from 6 AM - 6PM or until all paving equipment has been removed. Cars should be moved before 6 AM.

**See the next page of this letter for your DESIGNATED AREA and WORK DATE.**

Once the street has been overlaid it will be drivable after 6 PM or once all paving equipment has been removed from that street

**EMERGENCIES:** Tucson Asphalt stated they will cooperate with and expedite urgent or emergency traffic.

**TRASH collection:** Will take place on Mondays, no paving is scheduled that day.

**MAIL:** The mail-truck will be allowed to pass so it can continue to be delivered daily.

OTHER GUIDELINES OR QUESTIONS:

- ✓ Please refrain scheduling any projects to your home, such as painting, landscaping or construction, requiring access your home the day your street is scheduled. Since the day may need to be changed **it would be better to try to avoid the first part of June to schedule any projects.**
- ✓ Do not park where work will be performed or where it will block traffic.
- ✓ No car should be parked on the street on your designated day. It must be removed off the street by 6 AM or we will be required to tow it at the OWNERS' EXPENSE. Tucson Asphalt/San Ignacio Vistas (SIV) will NOT be held liable for any damage occurring during towing.
- ✓ Keep pets away from the construction for their own safety.

Prep work will begin prior to June 2 but that will only have a minor impact on traffic.

The overlay cannot be applied if it is too cool or if it is raining. If any rescheduling needs to be done, you will be notified.

I know there will be some inconvenience involved in this project, but if we work together we can keep it to a minimum and have excellent results.

Following is the Paving Order with Dates. Please make a notation on your calendar so that you don't schedule projects to your home during this time frame so you can avoid conflicts with the road project.
