- ✓ **Great disease resistance**
- ✓ **Quick establishment**
- ✓ **Winter active**
- ✓ **Excellent wear tolerance**

Seeding Rates:

**4-6 LBS/1,000
square feet**

Castle chewings fescue was selected for its dark green color, high tiller density, and excellent disease resistance. **Castle** chewings fescue is a very nice looking turf. It has dark green color, excellent density and is winter active. **Castle** was rated number one in genetic color in the 2015 Fine Fescue NTEP trials.

Castle is currently in the regional roadside turfgrass testing trial. The University of Minnesota, along with collaborators at the University of Wisconsin-Madison, Rutgers University, and Michigan State University, established a regional roadside turfgrass testing trial. This trial is being funded by four state DOTs.

Castle is excellent for areas with high traffic use. **Castle** rated #3 in the NTEP traffic stress trial and was the #1 chewings fescue for traffic stress tolerance. **Castle** is the ideal variety for golf courses, parks, roadsides, commercial and residential properties.
