

THE COMING MARKET CRASH

The purpose of this chart is to present a synopsis of the *natural cycles* of market crashes as they correlate to eclipses. This *Market Crash Theory* was developed by the professor, *Steve Pitts* who is an expert on cycles. He studied the conditions that are needed for a major money market crash to occur. Based on his research, the next US market crash could be predicted to occur in the Fall of 2015. Is it a mere coincidence that the most recent 8 of the greatest market crashes have happened either **6 Days** before a Full Moon or **3 Days** after a Full Moon and within 6 weeks of a Solar Eclipse? This seemingly secret knowledge of the *Market Crash Cycle* was alleged to have manipulated the markets using a mathematical formula to predict such economic cycles by the *Rothschild's* for example. According to the author, *Og Mandino*, most New York money market investors used this knowledge & understanding to predict market repeating cycles that were based on elliptical calculations. In turn, fortunes were made and maintained through investments based on this guarded knowledge. *Ralph N. Elliott*. He wrote a key piece in 1946 entitled '*Nature's Law - The Secret of the Universe*' noting the mathematical calculation used to calculate the money markets called the *Elliott Wave Theory*.

NOTABLE MARKET CRASHES

1. 1929 Crash
2. 1987 World Panic
3. 1990 Tokyo Crisis
4. 2000 Nasdaq Crisis
5. 2001 Fall Panic
6. 2007 Crash
7. 2008 777 Point Drop
8. 2009 Spring Crisis
9. 2011 Debt Ceiling Panic
10. 2012 NWO Crash
11. 2015 The Big One?

THE FED
thinks this is funny

For a 'Crash' to occur, there has to be *certain astronomical conditions* that have to be in place associated specifically when it comes to the cycles of eclipses. But what is significant to note is that the *Market Crash Cycles* have been found the following patterns.

1. Rise before a Full Moon &
2. Drop after a Full Moon

As this theory of the *Market Crash Cycles* cannot be 100% reliable, there can also be an alternate cycle sequence that might occur way before the forecast-as it was in 1929. If this would be the case, then weeks before the November 13 Total Solar Eclipse would put the start of the Panic around September 25, 2012 for example. This 'Panic' that usually follows the 'Peak' of the market may inadvertently start as early as **September 25/26, 2012**. This date of September 25/26, 2012 happens to coincide with *Yom Kippur* and the next *188 Earthquake Pattern*.

Given that the next Eclipse cycle, we can assess a possible crash scenario using this *Market Cycle Theory*. It does appear that this coming period would be a prime candidate for a 'perfect economic storm'. This *Market Crash Cycle* would correlate to the Fall Jewish Feasts as they have been in the past directly associated with Rosh HaShana and on the New Moon cycle.

BIBLICAL ECONOMIC RESET - SHMITAH 7 YEAR CYCLE

Many Bible researchers hold a belief that the *Luciferians* that control the world economy and Wall Street -in these Last Days, will use this coming *Market Crash Cycle* to perhaps inevitably implode the US-Europe dominated world economy to make way for their *New World Order NWO*. This is no big secret; the US President Bush I speech to Congress declared such a quest on **September 11, 1991**. (911 with 1991 = 911-1-991 sequence if 9=1 and 1=9 substituted) Interestingly, from the declaration to initiate the NWO on September 11, 1990 by the 1st Bush (Magog) to the attack on the Twin Towers on September 11, 2001 during the 2nd Bush (Gog) is 11 years. Then from the 9-11, 2001 Attack to **September 11, 2012** is the 11th Year Anniversary. (a 11-11 numerical sequence order) The USA Presidential Elections was on Nov 6, 2012 that is a 11-6 or a 'mirror' of 9-11.

You have a **13-13-13** number sequence in the 2 month period of a speculated market crash. You also have a date of number sequence that 'mirrors' each other as does the **9-11** with the Nov 9 or **11-9** US Presidential Election date. A complete crash cycle would look something like the following:

- First of all, the market would 'Top' off around this time.
- Around on 'All Hallows' Eve', the market would drop in a 'Panic'.
- Then the 6-Day window for the 'Crash' would lead up to the Solar Eclipse.
- The market would try to 'Rally' that will lead up to the Lunar Eclipse.
- Within the 3-Day after the Lunar Eclipse, the actual 'Crash' would occur.
- It is also possible to have the actual 'Crash' extend, which leads to a Full Moon.

The *Market Crash Cycle* scenario projected onto the month of September 2015 timeframe is only speculative at this time. It is impossible to economically predict with 100% accuracy when the next major economic crash will occur. Other economic analyst also predict that this possible crash scenario could also play for several months. The crash could thus reverberate out and prolong its effects to its conclusion by the end of **2016**.
