BERARD AIT PROCESS

___ **Step One:** Call TherapyWorks to provide information for intake form and create a profile. Then we will send you a complete pack of information.

___ **Step Two:** When we receive the packet back to the office you will receive a call from Megan so we can create your AIT schedule.

___ **Step Three:** Preparation meeting with Megan, parents/caregivers, and participant (within 1 week prior to start):

- Review packet of information, go over audiogram, AIT education
- Pre listening data collected

___ **Step Four:** Start of ten listening sessions. After day five of listening have second audiogram. When tenth listening session is done a third audiogram should be completed within one week.

___ **Step Five:** Follow up meeting to review third audiogram and assess changes.

___ **Step Six:** Continue to monitor for participant's changes. After 3 months and 6 months post AIT testing information will be mailed out to the address provided. Please fill out and return this information to Megan at TherapyWorks as soon as possible.

Important Note: *Not all participants will be appropriate for audiograms, this will be discussed with the practitioner prior to scheduling. Sensory reintegration can also be helpful during the "re-organizing" process in AIT due to the close relationship between the auditory, the visual-vestibular, and other sensory systems. Additional occupational therapy sessions can be added to develop sensory strategies for the participant upon request.*
