

hours. Your physician can help you get the placard. If you are loading or unloading your car, make sure it is displayed. If you are parked in a Handicapped Parking stall for over two hours, we will tow the car away. We have to be fair to the entire community.

The orange cones are placed in the front because the sign says No Parking. It is for Emergency vehicles only. Cars left there will be towed away. Michael said he recently saw a Makai resident get picked up by his family. Their car had a Handicapped placard, so they parked in the proper stall, came and got the resident, and then left.

First meals for new residents. Marketing is to let the Welcoming committee know so one of them can help the new person find a table and meet people. We have to be neighborly. Some only come out only for meals and we need for them to feel comfortable. The dining room coordinator wears a red shirt, and she can help new residents or others if there are problems.

Express tables were created for new residents in the front of the dining room. This is your community, so we need to help keep quality residents and make sure they don't get snubbed. Remember to be welcoming! They have a warm welcome by Welcoming Committee. We don't always know ahead of time when the new resident will move in. Ralph does a great job getting a photo of the new resident so the picture can be displayed on the 2nd floor.

Question of barking dogs was raised. Will not discuss this. It's between the cottages and other people at this meeting. Dogs are not allowed to live outside. They must remain in the house, or in the garage if resident lives in a cottage. We must live in harmony. They have been warned. Two written complaints and one verbal. The rules are not being enforced, they are being broken.
