Technical Data Sheet

Corbelstone Cast Stone is designed to meet or exceed building code requirements. Independent testing confirms our product complies with and/or exceeds the standard specification for Architectural Cast Stone Veneer as follows:

**Meets and exceeds
ASTM C1364-16e1,
which includes or exceeds:**
*ASTM C33
ASTM C150
ASTM A615/A615M*

**Compressive Strength Testing
performed in accordance with
ASTM C1194:**
*Average strength of 6,680 psi
exceeds the ASTM C1364
strength requirement of 6,500.*

**Absorption testing performed
in accordance with ASTM C1195:**

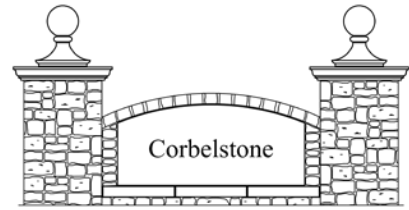

*Method A
(Cold Water)
Average maximum
absorption = < 6%
Method B
(Boiling Water)
Average maximum
absorption = < 10%*

Freeze-Thaw Durability
*Meets or exceeds ASTM C 1364:
The CPWL shall be less than 5%
after 300 cycles of freezing and
thawing.*

Linear Shrinkage
*Meets or exceeds
ASTM C 426: Shrinkage shall not
exceed 0.065%.*

Casting method:

Vibrant Dry Tamp

Reinforcement:

*Galvanized, Epoxy Coated Bar
or Fiberglass Bar*

Color Retention:

*Only permanent mineral oxide
colors are used.*

What is cast stone?

It is a precast concrete product that can be custom colored, structurally reinforced, and made in various shapes and lengths. It is made of sand, cement, and water.

Corbelstone cast stone is a quality product that is an affordable alternative to the elegant look provided by limestone.

Corbelstone has been a leading manufacturer in Georgia for over two decades, engaged in the manufacture and installation of fine Cast Stone products throughout the southeast.
