* Investment returns and principal value will fluctuate, so that investors' shares, when sold, may be worth more or less than their original cost. All the above data represents model or hypothetical results.

Green Pastures Defensive Growth Walk Model: Hypothetical back-tested performance results (from 01/01/2008 to 09/30/2022) have certain inherent limitations. Model performance results from 01/01/2008 through 09/30/2022 do not reflect the performance of an actual client account but rather the performance of a model account.

Hypothetical back-tested performance results assume a dynamically managed blend of the following funds utilizing GPWM's Defensive Growth dynamic asset allocation investment strategy: (1) Rydex S&P 500 Fund (RYSPX), (2) Rydex Health Care Inv (RYHIX), (3) Rydex Consumer Products Inv (RYCIX), (4) Rydex Utilities Inv (RYUIX), (5) Rydex US Government Money Market (RYFXX), (6) Rydex Inverse S&P 500 Strategy Inv (RYURX), (7) Guggenheim Floating Rate Strats A LW (GIFAX), (8) Guggenheim Limited Duration Fund A LW (GILDXX). GPWM may invest in different mutual funds that have not been included in the hypothetical back-tested performance results.

Past performance results may not be indicative of future performance results and the performance of a specific individual client account may vary substantially from the model performance results presented due to differences in the timing of account start dates, investments, withdrawals, custodian fees and actual fees paid. No current or prospective client should assume that future performance results will be profitable or equal the model performance results reflected herein. Future performance results may be lower or higher than the performance data cited. Hypothetical back-tested performance results do not represent the results of actual trading but rather the results of the retroactive application of a model that was developed with the benefit of hindsight utilizing historical data. In addition, the hypothetical back-tested performance results may not reflect the impact that any material economic or market factors might have had on the adviser's decision-making if the adviser had actually been managing clients' money during that period. The performance results reflect the reinvestment of money market interest, dividends and other earnings and the deduction of the adviser's 1.00% management fee (paid quarterly in arrears) and the fees assessed directly by the underlying mutual funds but may be reduced by custodian fees and transaction fees. The market index data shown above are for purposes of indicating general stock market price movements during the periods shown and do not represent investment portfolios comparable to the Green Pastures Defensive Growth Canter Model. The volatility of such indices used for comparison may be materially different from the volatility of the Green Pastures Defensive Growth Canter Model due to differences in diversification and other factors. The performance of such indices is not an exact representation of any particular investment, as you cannot invest directly in an index. Such indices are unmanaged and do not reflect the impact of any management or performance fees. "GP" = Green Pastures Defensive Growth Canter Model; "S&P" = S&P 500 Price Index.
