

bear

archery 1969

... for those who want the finest

What makes Bear the Number One choice of archers and bowhunters?

The biggest reason is the bows, themselves. In this day of mass produced goods, almost everyone is pleased by the craftsmanship so apparent in Bear archery tackle.

Bear uses mass production methods, to be sure, but demanding inspectors at every step make sure each Bear bow is perfect. These inspectors know what they're looking for. All of them are archers, so they're checking equipment they may be using themselves. At the end of the production line, each bow is hand sanded between numerous coats of the finest varnish, baked on under carefully controlled temperatures. Then, each bow is buffed and hand rubbed to a brilliant finish.

Performance is as beautiful as appearance. Giant thermostatically-controlled heat presses power bond fiberglass and wood together to form one strong, resilient unit. The result is a bow that draws smoothly and releases cleanly with tremendous strength and stability.

Then, too, Bear bows undergo constant change and improvement. Bear bowyers are always looking for new ways in which to make the archer more accurate, the bowhunter more efficient. Bear bows have always set the standard for the industry with "firsts" like these:

FIRST bows to be completely powered by fiberglass. Two-sided glass lamination was invented by Fred Bear.

FIRST bows to use high-compression materials.

FIRST bowsights to become an

integral part of the bow's design.

FIRST built-in adjustable arrow plate. Lets you "tune" to your individual shooting style.

FIRST to offer the long and short of archery—the super-recurve 72" tournament length bow, and the amazing 48" Super Magnum® hunting bow.

FIRST bow design to eliminate excessive bow movement and keep your arrow on target—the Golden Triangle of Stability.

Made by people who live archery

Why are Bear bows so advanced? Why the superb craftsmanship? Why the innovations, the constant improvements? Because Bear archery tackle is made by people whose main interest is archery.

All of the officers and most of the workers at Bear have spent a lifetime in archery. For example:

Our president is the world's most famous bowhunter.

Our vice president is a lifetime sportsman, national archery executive and bowhunter.

Our advertising manager is a Pope & Young record holder. (So is his son.)

Our bowyer is a nationally-recognized authority on modern bow design.

One of our district managers is a leading archer of the Professional Archers Association. The other thirteen district managers are avid tournament competitors and bowhunters.

Nearly all of the employees in the plant compete in archery leagues and bowhunt daily in season.

It's the climate at Bear. An understanding and a love of archery that creates a desire to produce an unexcelled product, year after year. This devotion to archery often is family wide. We have many father and son combinations at Bear, as well as husbands and wives working together; even entire families sharing the pride of workmanship that made Bear Archery famous.

Continuous support of archery

But it's more than producing a great line of bows, arrows and equipment. It's the wholehearted support given to the sport of archery. From the 1930's, when Fred Bear waged a one-man lobby for national recognition of bowhunting, to the present day, both Fred Bear and Bear Archery have devoted time and money to the betterment, improvement and furtherance of national and local archery associations and clubs.

If it has anything to do with archery, you can bet Bear is behind it.

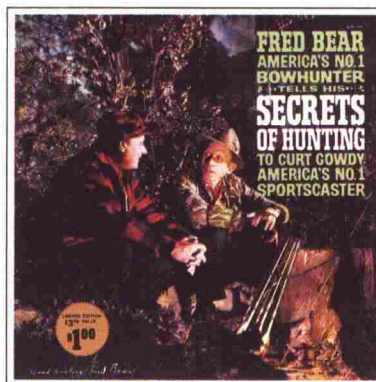

Number One again in '69

So there are many reasons for Bear's popularity. The quality of the bows, their design, the care used in their manufacture, the devotion of the company and its employees to archery, and many more. In fact, there are probably as many reasons as there are Bear owners.

On the following pages are 14 new reasons to buy Bear. They are the fourteen new 1969 bows. A complete selection for tournament archers, bowhunters, and people who enjoy a little of both. In addition, you'll find a complete line of inexpensive, solid glass bows that are perfect for the beginning archer or for instructional use in schools and camps.

Pick out the bow you want and see your Bear dealer. You never have to have a reason to drop by his store. Anytime you want to talk archery or bowhunting, your Bear dealer's ready. See him soon and ask to see Fred Bear's special record, "Secrets of Hunting." As an archer, you'll want this fine long-playing record for your collection. And, for good reading, you can't top "The Archer's Bible" by Fred Bear. It's the complete book on archery and bowhunting every archer has been waiting for. Your Bear dealer has this absolute "must" for your library.

See your Bear dealer . . . the place to get archery tackle when you want the finest.

The prices in this catalog are for purposes of establishing discount schedules to the trade. These prices are not used or intended to represent the actual selling price to the customer in any given trade area. Goods are priced competitively whenever sold at the retail level and these prices may vary greatly in different market areas.

HC-300®

Proven in tournament after tournament by dozens of archers, the Tamerlane HC-300 is definitely the bow other shooters have to beat.

Few sporting goods items can claim a clear superiority over the rest of the field. The "Louisville Slugger" bat stands out as perhaps the prime example. Nearly every professional ball player uses one. Now add a second "choice of champions" to the list: The Bear Tamerlane HC-300; the winningest bow in archery.

Ask the top shooters in the country what their choice is; professionals and amateurs alike. You'll get a unanimous "HC-300" answer from the likes of Vic Berger, Frank Gandy, Jim Pickering and Clarence Kozlowski, as well as distaff votes from Gwen Learn and Evelyn Goodrich.

These top performers rely on the tremendous strength and stability of this great bow.

Strength that comes from exclusive Bear touches like the 3-ply overlay on the face and back of the bow. Three layers of fibre for strength as well as beauty. And stability that comes from the exclusive Golden Triangle design. The only bow that thinks for itself. Keeps the arrow on target should you have a mental lapse. Then, too, there's the fascinating Fascor®. It's the dark core that's the talk of the industry, the heart of every HC-300.

Get in the winner's circle with your own Tamerlane HC-300. It's at your Bear dealer's.

temujin®

In its freshman year, the Temujin carved out quite a name for itself. The adventuresome shooters who bought Temujin were pleasantly surprised at its performance. For a newcomer, it had all the speed and stability of a bow with years of development behind it. It turned out to be a phenomenal "rookie of the year."

This year's Temujin will win even more fans, more tournaments, too. The now-famous Temujin silhouette is unchanged. It's still a study in balanced "opposites," with every flare and curve on the front of the riser mirrored on its opposite surface. A new, richer looking riser is due to the combination of East Indian Laurel and East Indian Rosewoods with Hardrock Maple striping. And, the 3-ply fibre overlays on the face and back of the riser give extra strength and beauty to Temujin.

Drawing is still nice 'n' easy. The release is sure and smooth as graceful white glass limbs whip the arrow toward the goal. In your follow-through, you'll appreciate the Golden Triangle design as the limbs quickly dampen with only the slightest recoil.

Make this your year to win. Make it the Year of the Temujin.

tartar®

Tartar is the tournament favorite of archers who prefer a lighter bow. It's slim and trim with a grip that's as comfortable as slipping your hand into a glove. The 66" length suits most shooters to a "T."

But don't be fooled by Tartar's slimness! It's plenty fast and plenty stable. Part of the secret is the Golden Triangle of Stability. Excessive bow movement is controlled, even if your shooting style is slightly off.

Tartar's hand-rubbed riser is a knockout! Shedua, African Bubinga and an accent stripe of East Indian Rosewood. Its fully recurved limbs are pure white. The tips are reinforced with Bearglas® overlays—famous Bear quality visible at a glance!

See the lightweight tournament contender, Tartar, at your Bear dealer's.

polar®

Polar is the bow for swingers! Slips neatly into any Mustang or Camaro trunk, or tie it to the back of your bike and go! It's lightweight, slim . . . just right for most shooters. And, its two-way grip feels comfortable to any young archer—guy or gal.

That handsome riser is exotic Tigerwood, set off by white glass on the face, Arctic Grey glass on the back. The bow tips are triple-reinforced with three layers of Bearglas®. It's an added touch of Bear quality. To make it tournament ready for Junior Olympic Competition, you can order both the Premier Bowsight and Bear Omni-Coupler Stabilizer and have them installed at the factory.

There's a 63" Polar for those archers with shorter draws; a 66" version for the average shooter. Whatever size, both models shoot to win.

Hurry on down to your Bear dealer's and meet the swinger, the Bear Polar.

super kodiak®

The best testimonial to the Super Kodiak is the Fred Bear Museum in Grayling, Michigan. As you glance around the huge trophy room, you are awe-stricken by the scores of trophies bagged by Fred Bear. A huge elephant's head dominates the room. Over there a lion is doing battle with a fierce Cape Buffalo. There's a massive polar bear, giant moose and an enormous grizzly.

All these magnificent game animals of the world, and many more, were taken with predecessors of the Super Kodiak, or in the case of the polar bear, the Super Kodiak, itself. What a heritage!

And the Super Kodiak and you, its owner, are the benefactors. Proven on the game trials from Mozambique to New Mexico, the Kodiak design reaches the pinnacle of perfection in the Super Kodiak. You can order your Super Kodiak with a factory-installed hunting sight and new hunting stabilizer. Either or both optional accessories can be

added to give you ultimate accuracy in hunting tackle. World-famous Bear quality is everywhere—three-ply fibre laminations on the back of the riser add strength as well as beauty; the tips have overlays of rugged Bearglas®. And, the heart of the bow is Fascor®, proven in tournament and field on the HC-300 and Super Kodiak.

Get the bowhunter's bow, Fred Bear's personal choice! Get the Super Kodiak!

super magnum 48

In thick brush, in a blind, or hunting from a tree stand, there isn't a heck of a lot of maneuvering room. And when the opportunity for a shot does present itself, you seldom have the time or space to untangle a big bow. That's when you'll be glad you bought a Super Magnum 48.

The Super Mag's a four-foot powerhouse. Compact enough for any cramped space, accurate enough to thread the needle through any opening, and powerful enough to drop any game you're after.

This year, Super Mag has the new Fascor® used in the incomparable HC-300 and Super Kodiak. You can have your Super Magnum factory-equipped with the new Hunting Stabilizer to give big bow stability to the "little demon."

When you're short on room, make sure you're long on bow, get a Super Magnum 48. It's at your Bear dealer's.

kodiak[®] magnum

As the world's most popular compact hunting bow, the 52" Kodiak Magnum has captured a strong following among bow hunters. Making a shorter bow isn't difficult, but making one that *performs* is another story. And that's the story of the Kodiak Magnum: performance.

Being shorter than most hunting bows doesn't make Kodiak Magnum less powerful or accurate. On the contrary, that's our long suit. You can match it with the big boys any day. Note that there's no draw limit. The "Mag" can handle a 32" arrow as easily as a 28".

And the Magnum's long on looks, too. It's identical to the Kodiak Hunter, its partner in prey. The new wood in the riser is exotic Tigerwood, hand-sanded and hand-rubbed to brilliance. The glass-powered limbs are new Arctic Grey, with black tips, reinforced with overlays of Bearglas[®], and black and white caps which are triple layers of Bearglas[®] on the riser's back—that

added edge of security found only in Bear bows.

See it for yourself at your Bear dealer's . . . the smooth-shootin' Kodiak Magnum.

kodiak[®] hunter

Here's the running mate of the Kodiak Magnum—its twin terror, the Kodiak Hunter. The Hunter's 60" length makes it a popular choice for bowhunters who prefer a longer bow. It's a fitting companion to the 52" Kodiak Magnum—use the "Mag" under heavy brush conditions, the "Hunter" in open spaces and flat lands.

A twin in looks, a twin in performance. Kodiak Hunter has the Magnum's smart appearance—Tigerwood riser, Arctic Grey glass limbs with indestructible black Bearglas[®] tip overlays and 3-ply Bearglas[®] on the back of the riser adding strength and that special Bear touch of elegance.

It also has its tradition of fine shooting. The Hunter's broad limbs are built for power. Unleash a few arrows and see for yourself. It has "backbone" a-plenty to move heavy hunting arrows to their mark at any range.

grizzly®

See the bow that has everything going for it: balance, smoothness, power, resilience and style. The Kodiak Hunter, now at your Bear dealer's.

\$90 (Can be ordered camouflage-painted for \$5.00 additional)
(Fred Bear Hunting Bow Stabilizer may be ordered as original equipment with Quick-Connect, factory installed, for \$12.00)

The Grizzly is "old reliable" to the bow-hunting fraternity. Constant improvements are added to it each year, and hunters have bought a bundle of 'em. It's got to be the most popular hunting bow in America.

Grizzly's introduced many a hunter to bowhunting. That's why so many Grizzly owners are "two-season" hunters. The Grizzly's modest prices makes it a much-used addition to a gun rack and an introduction to a whole new second season of hunting enjoyment.

This year's Grizzly sports a new riser of beautiful Shedua, contrasted with deep Forest Green limbs with white tip overlays for greater reinforcement. It still has the legendary Grizzly performance—top accuracy in a hunting arm. This accuracy is now greatly increased because this year's model is whisper quiet. There's no telegraphing bowstring "twang" to send a white-

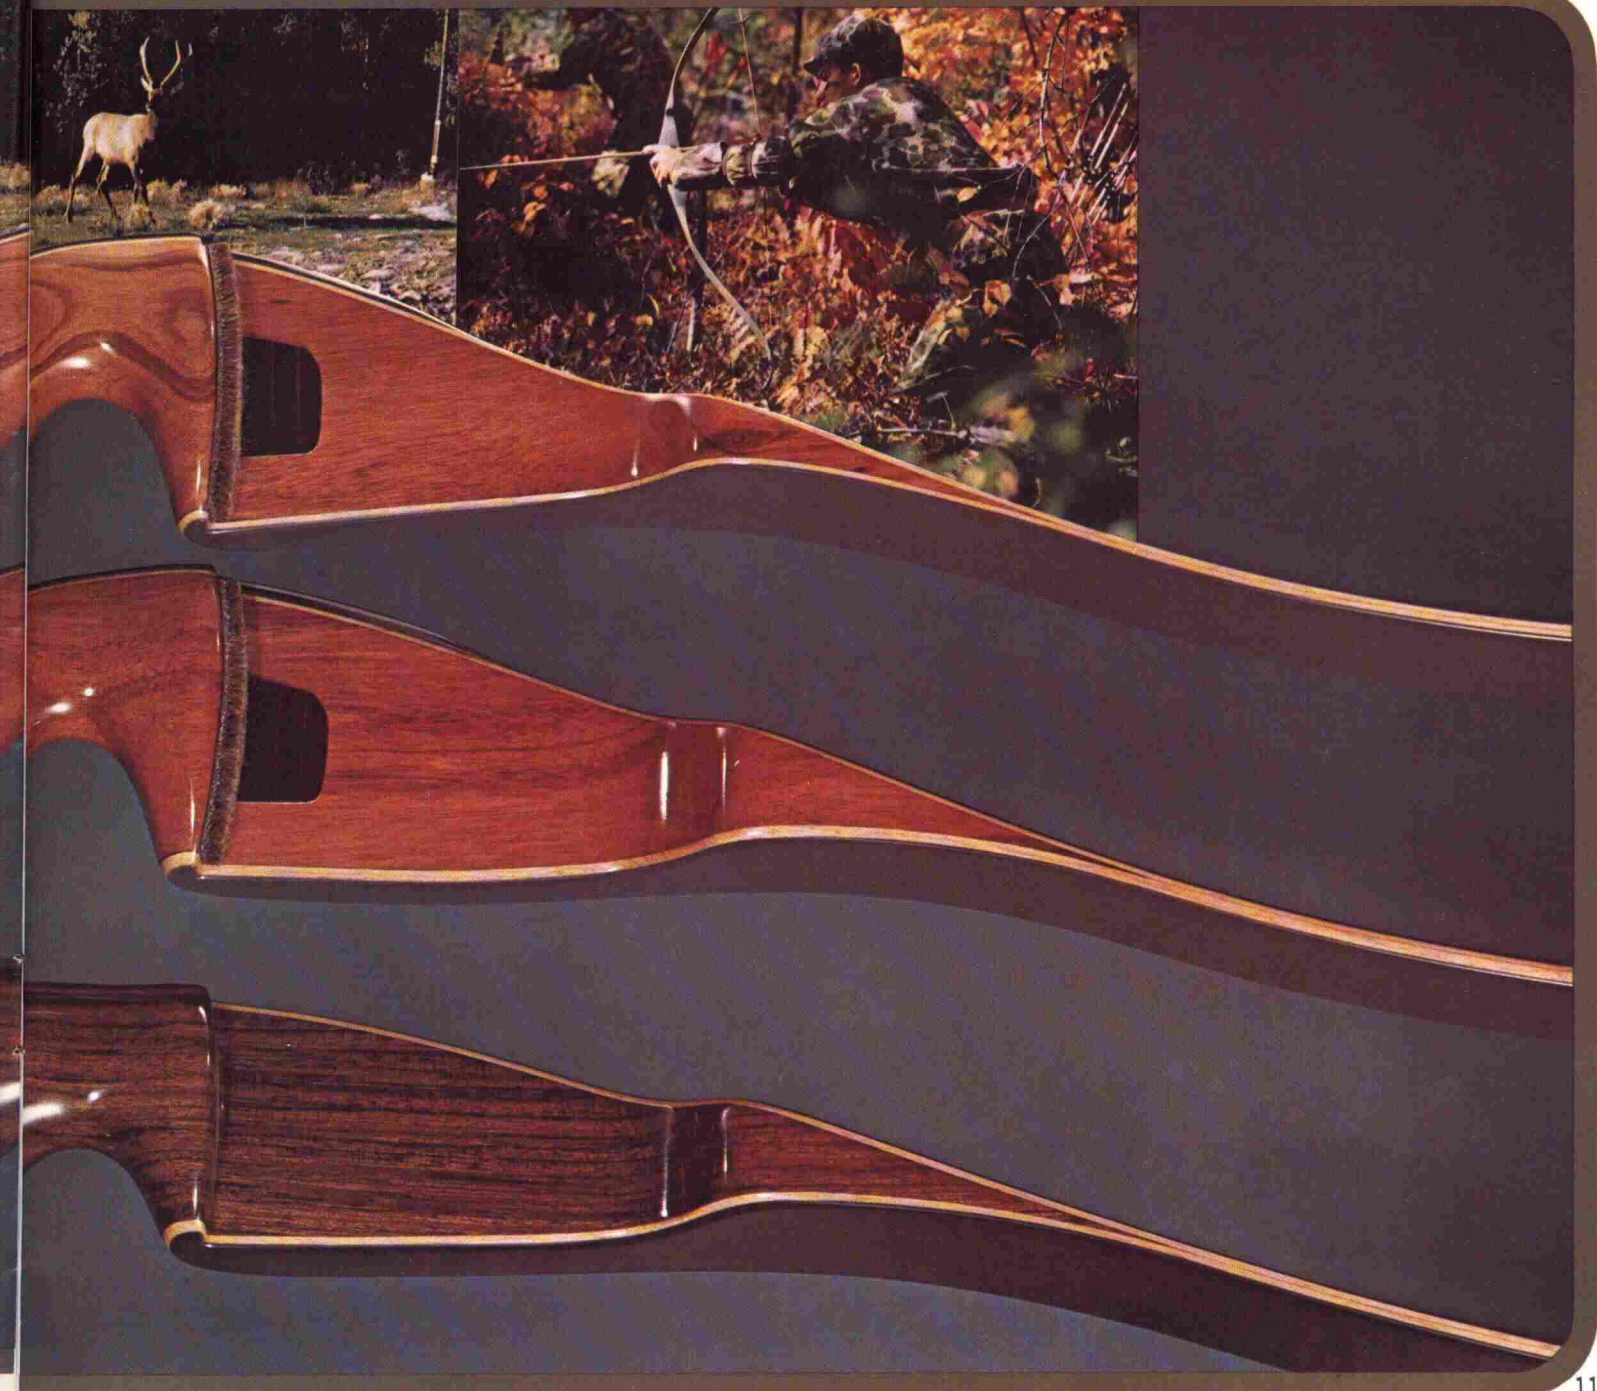

tail flying before your arrow leaves the front of the bow. The Grizzly is practically "spook-proof!"

See for yourself why Grizzly is a living legend. Right now, at your Bear dealer's.

tigercat®

There are many people who enjoy all aspects of archery—tournament shooting, field archery, bowhunting and just plain backyard “plunkin’”—and who cannot afford to have a special bow for each one. To these folks, the Tigercat is the answer.

Tigercat is at home anywhere . . . on the range, in the field or in the forest. It has all the class and stability to be a truly effective tournament bow. In the field, its swift cast delivers the power for any hunting assignment.

To aid in either pursuit—target shooting or bowhunting—Tigercat can be ordered factory-equipped with your choice of a 5” Bear Premier Bowsight or Hunting Sight.

See the sleek, new Tigercat. Its African Bubinga riser and Cinnamon Brown limbs with reinforced Bearglas® tips will really catch your eye. At your Bear dealer’s, now.

Fred Bear "Converta-Point" Magnum Arrows

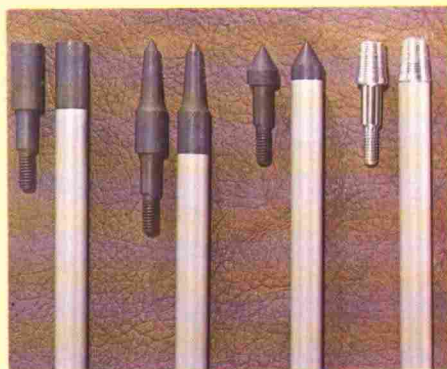

The ultimate in arrows—with interchangeable points—personally designed by Fred Bear!

Fred Bear Magnum Arrows with Converta-Points are the finest of all hunting and field arrows. They are made of a special tough aluminum alloy to Fred Bear's specifications by James D. Easton, and feature Fred's own patented system of interchangeable heads.

Converta-Points are not a conventional screw-in point. Arrow shafts are fitted with a specially-formulated insert material which accepts the threads of the screw-in Converta-Points. The special insert material insures a compressive, shock-resistant fit preventing the point from loosening on impact and eliminating "freeze up" as in the case of metal to metal.

The Converta-Point consists of: (1) a special adapter to fit Razorheads or heads of your choice; (2) a blunt point matched to Razorhead weight; (3) a field point matched to Razorhead weight; (4) a 75 grain target point as a fourth choice.

With a dozen "Magnums," you're set for big game hunting, small game hunting, field archery, hunting practice, even target shooting! Enjoy them all by changing from single point style to Converta-Points without special tools or techniques.

Fred Bear "Converta-Point" Magnum arrows are specially coated with a hard-anodic film that gives exceptional wear resistance, complete corrosion protection and a no-glare finish. Attractive cap dip, multi-color cresting with hand pin-striping. Carefully matched feathers fletched to a true helical. This combination of finest materials and workmanship makes the Fred Bear Converta-Point Magnum Arrow the first choice of the discerning Archer or Bowhunter.

Fred Bear Magnum Arrows are available in the following tube sizes covering the entire range of hunting and field arrows: .308 for 40/50 lbs. bows, .312 for 50/60 lbs., .316 for 60/70 lbs., .320 for 70/80 lbs.

1030 Cut to length, fitted with high strength inserts (no points) **doz. \$46.00**

1031FL Full length with high strength inserts unattached (no points) . . **doz. \$45.00**

**Fred Bear Kodiak®
Supreme Fiberglass
Arrows**

The new Fred Bear fiberglass Kodiak arrow in the Supreme grade is the finest arrow of its kind. Straight, extra tough and unaffected by moisture or temperature. Carefully graded for uniformity and top quality featuring attractive cap dip and multi-colored cresting with hand pin stripes. Premium feathers in 5¼" hunting length fletched to a true helical. "Bear jade green" color is as rich as its name denotes and a fitting compliment to this finest of fiberglass arrow shafts.

Available in lengths to 32" and in sizes .407, .408, .409, .410, .411 to cover a wide range of spine.

Specify exact bow weight at draw length. We will select proper shafts from the sizes available.

**Kodiak Supreme Fiberglass Arrows
For Hunting and Field Shooting**

1071FL Full length with broad-head adapters unattached. 5¼" helical fletching, suitable for hunting or field shooting **doz. \$35.00**

1072F or 1073B Cut to length with Field or Blunt 125 grain points, interchangeable with Razorheads . . . **doz. \$38.00**

1074H4 Cut to length with Fred Bear four-blade Razorheads. **doz. \$41.75**

1075S Cut to length with matched set of 6 four-blade Razorheads and 6 field points. (Points same weight and interchangeable) **doz. \$40.00**

Kodiak Supreme Fiberglass Flu-Flu

Swift, accurate, limited action flu-flu arrow for bird shooting, small game, or trap shooting. Feathers are designed to provide fleeting initial flight, but slow down at peak of arc to limit distance of travel. Specify bow weight at draw length.

1065S Cut to length, matched set of 6 four-blade Razorheads and 6 125 grain field points. (Points interchangeable.) . . . **doz. \$17.00**

1067B Flu-Flu, wrap-around fletch, 125 grain blunt point. Available in weights and lengths as above 1062F (box of 4) **\$ 7.00**

**Tips on sharpening your
Bear Razorheads®**

Razorheads are factory-sharpened, but should have additional sharpening before being used on game. This is best done with a mill file such as our 3135 or Bear's new 7255 Cutmaster Sharpener. File toward the point and at the original bevel. Finish up by holding the file flat on the bevel at a 90° angle to arrow shaft and take five or six light strokes on both sides of edge. This has the same effect as a butcher's steel in removing burr for best final cutting surface. Do not file main blade to long slender point. A rounded, chisel point (see illustration) will prevent it from curling when striking hard bone.

Point Styles Available

These are the four popular point styles available on Bear Arrows. Type of point is listed under each.

FIELD POINT—125-GRAIN

BLUNT—125-GRAIN

RAZORHEAD®

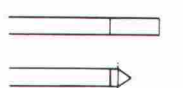

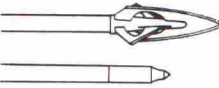

TARGET POINT

Note: Arrow length is measured from bottom of nock slot to the back of the head.

H-4 Razorhead

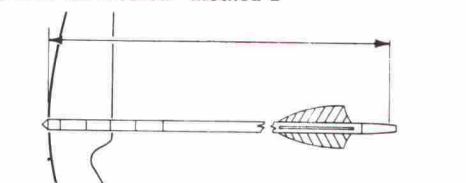

B Blunt

F Field Point to match broadhead

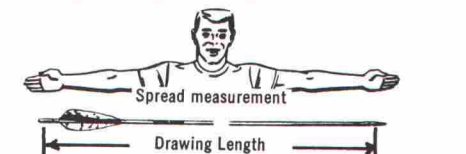

T Insert Target Point

**Selecting Correct Arrows
Preferred Method—Method 1**

Draw a measuring arrow (marked in inches) in your bow. At full draw, your correct arrow length is the point at which the arrow stops in relation to the front of the arrow shelf. See illustration above.

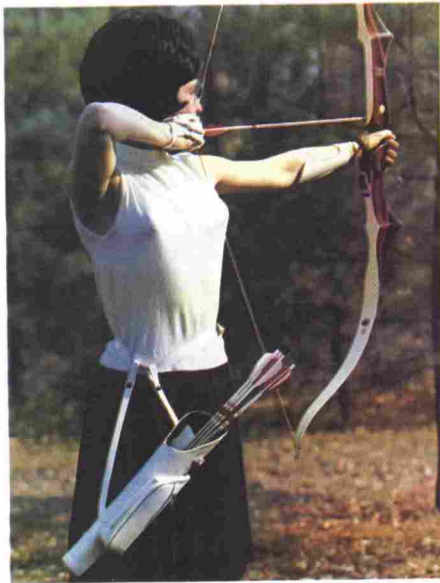

Alternate Method—Method 2

Spread Measurement	Arrow length
57"-59"	24"-25"
60"-62"	25"-26"
63"-65"	26"-27"
66"-68"	27"-28"
69"-71"	28"-29"
72"-74"	29"-30"
75"-77"	30"-31"

bear quivers

and handsome

3205

3220

3180

3170

3175

3210

3215

Bear quivers are made of specially selected top grain leathers. That's why they're able to withstand rugged use and still give the long lasting wear archers have come to expect from Bear leather goods. They are produced exclusively by Bear craftsmen, skilled in the intricacies of leather-working and design. You'll recognize that only hand craftsmanship can produce the fine detailing and consistent quality found in all Bear quivers.

3180 Big Bear Quiver

Top grain black steerhide with smoked elk trim. Big enough for 24 arrows. Three roomy compartments, large zipper pocket, hang-up ring and "totin" thongs included. Easy on-and-off harness. Length 23".

3180 Specify right or left-hand. . . . \$35.50

3170 Western Quiver

Smoked elk and top-grain cowhide combine to form this superbly-crafted quiver. Holds 18 to 20 arrows. Includes easy on-and-off harness, hang-up ring, and thongs for foul-weather gear tie-up.

3170 Specify right or left-hand. . . \$29.50

3175 Cheyenne Centerback Quiver

Hand stitched quality leather construction throughout. New fast action pack style harness affords perfect individual adjustment and comfort. Roomy accessory pocket. Holds 14-18 arrows easily.

3175 Black. \$28.50

3185 St. Charles Quiver

A Bear exclusive—holds 14 broadheads securely in place, ready for action. Hunter may instantly draw with either hand with a minimum of movement. Antique elkskin hood protects feathers; foam-rubber base keeps broadheads sharp. Chest thong and pack harness distributes weight evenly, comfortably.

3185 (Without accessory pack). . . . \$28.50

3200 (With accessory pack) \$36.50

3190 Accessory pack only (may also be used as belt pack) \$ 8.25

3205 Trophy Quiver

Top grade leather in an eye-appealing design. The Bear Trophy Quiver holds 20 arrows in two compartments without crowding. Big side pocket with zipper. Black, brown, smoked elk, antique, white leather, or new embossed black lizard, black alligator and western brown.

3205 Specify right or left hand \$22.00

3210 Texan Quiver

Two roomy compartments hold 14-18 arrows. Contrasting color coordination on big zipper pocket and cuff.

3210 Specify right or left-hand. . . . \$21.00

3215 Blackhawk Quiver

Skillfully-tooled front design gives the Blackhawk its unique appearance. Ideal for both novice and expert. Brown with smoked elk trim. 19" length.

3215 Specify right or left-hand. . . . \$13.00

3220 Shawnee Quiver

Constructed of rugged Bearhide for inexpensive yet long-lasting use. Holds 10-12 arrows. Brown-tan coordination with quality leather trim.

3220 Specify right or left-hand. . . . \$ 7.00

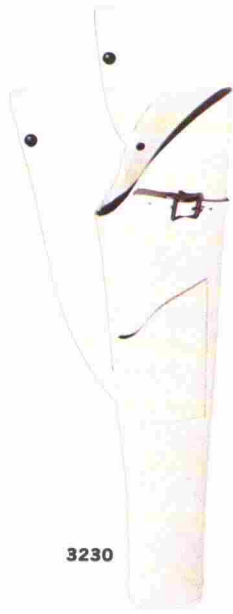

3225 Tournament Quiver

This fine belt quiver is designed with the tournament archer in mind. Includes arrow divider and two belt straps. Extra-large zippered pocket, score card clip, and pencil holder. Constructed of high-quality leather. Holds 12 arrows. 19" length. Specify right or left-hand.

3225 Black, brown, smoked elk, white, antique or new embossed black lizard, black alligator and western brown. . . \$20.00

bear razorheads®

preferred and used by
six out of every 10
pope & young record-holders

A four-blade, razor-sharp broadhead acclaimed as the most lethal hunting head ever developed. Two precision made blades combined. The main blade of mill-tempered spring steel is silver brazed to a one-piece steel ferrule and is long-bevel ground and honed to extreme sharpness. An easily replaceable, lightweight auxiliary blade, also of razor steel, completes the four edge broadhead.

Although the main blade comes from the factory extremely sharp, heads should be further filed or honed to achieve complete effectiveness. Also, after each use the main blade should be filed at the original bevel. Auxiliary blades should be discarded after each hunting shot. However, they can be sharpened at camp by first using a medium stone to bring up the edge then honing with a very fine stone. (See page 17)

Fred Bear Razorheads

One dozen Fred Bear single-blade Razorheads plus one dozen razor-auxiliary blades and slot cleaning tool. In handy protective "skin pack."

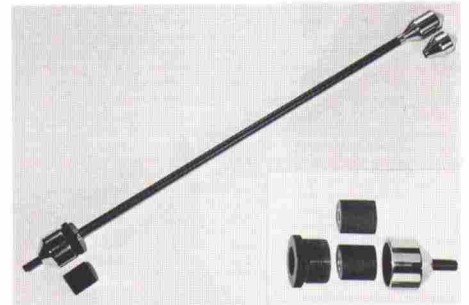

5114 doz. **\$ 7.95**

Auxiliary Blades

Extra insert blades for the 5114 Razorhead. One Dozen per package. Weight 10 grains each.

5121 doz. **\$ 1.75**

omni-coupler and stabilizers

New Bear Omni-Coupler

The newest, and most advanced, development in stabilizers, the Bear Omni-Coupler improves shooting accuracy and consistency by allowing the bow to move at the "moment of paradox" during the shooting sequence. But while the bow is moving, the new lightweight tubular rod and weighted head of the Omni-Coupler remain relatively stationary! This gives your arrow a truer flight, greatly improving accuracy.

The Bear Omni-Coupler counteracts the shock and vibration of the bow limbs after the arrow is released, creating faster dampening action and that s-m-o-o-t-h feel found only on a Bear bow.

The Bear Omni-Coupler consists of two interchangeable compressible bushings of different densities, two interchangeable heads of different weights and a lightweight tubular rod. You can select the right combination of all these elements that will best complement your own personal shooting style.

7311 Bear Omni-Coupler with 2 interchangeable compressible bushings **\$18.00**

7310 Bear Omni-Coupler complete with tubular rod and two weighted heads in carrying case **\$35.00**

(Also available: ¼" stud to fit other bushings and stabilizer rods.)

New Bear Hunting Stabilizer

The first hunting stabilizer ever offered to bowhunters. A compact unit consisting of a chrome-plated weighted head and a built-in flexible coupler. The entire unit is just 3½" long and comes in its own camouflaged case for use in eliminating glare and reflections when hunting.

The Bear Hunting Stabilizer offers you: (1) greater accuracy; (2) reduced string noise; (3) less bow movement; (4) better arrow clearance; (5) improved "feel."

7320 Bear Hunting Stabilizer with case **\$12.00**

(May be ordered installed on any new 1969 Bear Hunting Bow for only \$12.00 additional.) No charge for installation.

bear bow quivers

**the ultimate in convenience
and fast action
for the bowhunter!**

Speed and stealth are the things in bowhunting. And with Fred Bear's own design bow quiver, they're yours! Snaps on and off your bow in a flash. Serves up arrows at a touch. Ample room on the 8-arrow model to carry a full day's load of arrows at your fingertips. If lighter weight is preferred, use the 4-arrow model in combination with a back quiver.

3590 8-Arrow Bow Quiver
made in three sizes: **\$22.00**

3590S (short) fits most hunting bows from 52"-62". Works best on the short Kodiak® Magnum-type bow. (Specify right or left-hand model.)

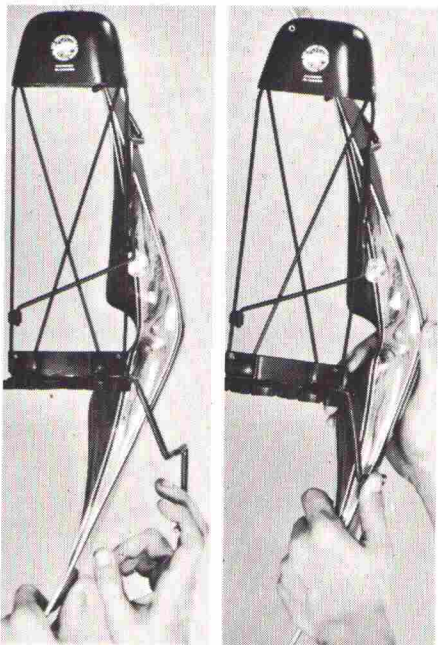

3590R (regular) fits bows from 60"-64". Works best on medium-length hunting bows such as the Super Kodiak®. (Specify right or left-hand model.)

3590L (long) for hunting bows from 60"-66". Works best on Polar-type bows (Specify right or left-hand model.)

3615 4-Arrow Bow Quiver
in two sizes: **\$19.25**

3615S (short) fits most short hunting bows from 56" down. (Specify right or left-hand model.)

3615R (regular) fits most hunting bows from 54" to 66". (Specify right or left-hand model.)

Plastic-coated bracket wires protect bow finish when mounting or detaching the Fred Bear Bow Quiver. Works quickly, easily and smoothly on a strung bow.

Replacement Parts

- 3605R** Front Bracket, Regular \$ 3.00
 - 3605L** Front Bracket, Long \$ 3.00
 - 3610R** Rear Bracket, Regular \$ 2.25
 - 3610L** Rear Bracket, Long \$ 2.25
- (Specify right or left-hand model)

IMPORTANT:

We recommend that when buying a bow quiver, you actually put it on the bow you wish to use it with, to make sure you have the right size. If the 3590 or the 3615 will not fit the hunting bow of your choice, we suggest you try the 3620 or 3625

Bear Screw-On and Tape-On Bow Quivers

3625 Screw-on Bow Quiver

Threaded brass bushing fits in bow handle. When attaching quiver, a small coin serves as screwdriver. $\frac{21}{64}$ " bushing affects neither bow nor your accuracy. Holds 4 arrows. (Specify right or left-hand model.)

3625 \$16.25

3620 Tape-on Bow Quiver

Rigid, two-point mounting tapes onto bow riser. Use ordinary household, adhesive or electrician's tape. Always wax this section of bow before taping. Holds 4 arrows. (Specify right or left-hand model.)

3620 (plastic tape included) \$16.25

bear makes bowfishing a snap!

3025
\$10.65

3010
\$7.65

7915
\$ 8.60

Bowfishing is a snap when you're using Fred Bear's Bowfishing Rig. Snaps on and off your bow in seconds. Your bow is protected by the vinyl-coated spring-steel brackets that grip it tightly. Once on, they automatically position the reel in place, ready for action. Spinning-type reel has no moving parts to wear out or replace. Waterproof, too. Solid glass Bear Harpoon Arrow will hold even the fight'n'est fish without snapping.

Bear Bowfishing Outfit

bowsights and accessories

**Fred Bear Premier Bowsight
6050 \$24.95**

First and only bowsight custom designed to become an integral part of your bow. With the Fred Bear Premier Bowsight, you can instantly set both elevation and windage compensation—puts you on target for every shot. The Adjustable Nylon Arrow Plate allows you to tune your bow to the spine of the arrows used and to your individual style of shooting. A wide choice of accessory apertures and arrow rests are available. Available in both 5" and 7" lengths. The 6170 Standard Post and 6200 Bristle Rest are standard equipment. (See Optional Accessories, this page.)

6050

6075

Bear Premier Hunting Sight

6075 \$24.95

In choosing a bowsight for hunting, you'll naturally want the finest—the Bear Premier Hunting Sight. This precision-made sight is designed to become an integral part of your Bear hunting bow. It's built right into your bow to fit perfectly. The 5" Premier Hunting Sight features a 6200 Bristle Rest, and Adjustable Nylon Arrow Plate, for proper tuning of arrows, and three fluorescent rings—mounted one above the other. You preset a different yardage into each of these rings. This prepares you to shoot from three known distances without having to adjust your sight. Various accessory apertures and rests, as well as additional fluorescent ring assemblies (6245) may be used. (See Optional Accessories, this page.)

Replacement Parts

Replacement parts for the Bear Bowsights and Premier Arrow Rest are available from your local authorized Bear Dealer or from Bear Archery Company, Rural Route One, Grayling, Michigan 49738.

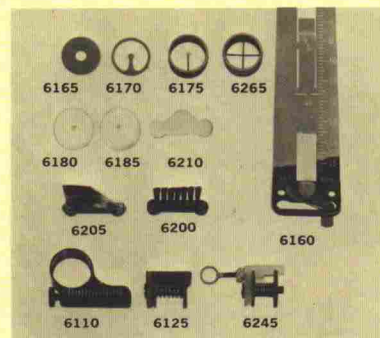

Bear Premier Arrow Rest

6255 \$ 3.75

"Tune" your bow to your arrows and to your style of shooting with the Bear Premier Arrow Rest. This attractive combination bristle rest and nylon arrow plate will fit any bow—give it a distinctive appearance. Easily adjustable, the rest comes with complete instructions for installing. A large selection of rests are also available. (See Optional Accessories, this page.)

7007 doz. \$ 2.10

Top Quality Bear Bowstrings

Bear guarantees these bowstrings to be the finest made. Only extra strong double-loop Dacron strings are used and each is laid by hand rubbing. Custom made Bear bowstrings are sized to fit every bow from 10 to 80 lbs; 48" to 72" in length. "String length" pertains to bow length; this is the distance between the nocks, following the curve of the limb, usually marked on the side of the bow.

New Fred Bear Professional Bowstrings

Smart plastic carrying case marks the new professional bowstring. Extra strong double-loop black Dacron strings have full monofilament servings and loops. Hand rubbed strands in custom made sizes for bow weights 25/35, (10 strands) and 35/45, (12 strands); lengths 66", 69" and 72" only.

7105 ea. \$ 5.00

Bear Temper Strand Bowstrings

Hand rubbed, double-loop Dacron strings with full nylon servings. Sizes for every bow weight from 10 to 80 lbs. in the following lengths: 48", 52", 54", 56", 58", 60", 62", 63", 64", 66", 68", 69", 70", 72".

7100 ea. \$ 1.50

Bowstring Chart

7100 Strings (all lengths) are made in 6 bow weights, listed here with the number of strands of 1100/2 Dacron "B" used:

Up to 25 lbs.	8	45-55 lbs.	14
25-35 lbs.	10	55-65 lbs.	16
35-45 lbs.	12	65-80 lbs.	18

Double-Loop Dacron Bowstrings

Center-serving. Made in sizes 48", 50", 52", 54", 56", 58", 60". For bow weights to 35 lbs.

7102 \$.95

Single-Loop Bowstrings

Single-loop Dacron scout string with center serving. For all bow lengths, and weights to 45 lbs. (18 on display card.)

7101 ea. \$.75

Braided, single-loop Dacron string, without center serving. For all lengths and weights to 40 lbs. (18 on display card)

7062 Nylon thread only (colors above) \$ 1.25

7063 Monofilament thread only . . . \$ 1.25

New Super Dacron Bowstring Thread

Make your own bowstrings with these 4-oz. spools of super Dacron thread.

7052 B-43 pre-waxed fibre, white only ea. \$ 3.75

7053 B-43m pre-waxed in black, yellow, green . . . ea. \$ 4.00

Headshrinker

Conical aluminum bushings for adapting Razorheads® to shafts under $\frac{5}{16}$ " diameter. Extends shaft $\frac{1}{2}$ " for extra broadhead clearance.

7089 doz. \$ 1.50

Fred Bear Bowstring Wax

Get maximum wear from your bowstrings by waxing them frequently. Designed especially for synthetic fibres. In convenient, neat, push-out tube. (12 in a display carton.)

7057 ea. \$.95

3 Bear Bowstringer

Used and recommended by "Gentleman Jim" Pickering, member of the Professional Archer's Association and one of the country's top tournament archers. Made of imported calhlide pockets and nylon cord. Can also be used when bow tip protector is installed. Prevents twisted bow limbs and guards against injury. (12 in display carton)

7850 ea. \$ 3.00

Bear Bowstringer

Adjustable leather strap fits over shoe, bow tip rests securely in cup. Eliminates chance of scratching bow tip or slipping while stringing bow. Eliminates limb twist; makes heavier bows easier to brace. (6 on display card.)

7855 \$ 1.25

String Keeper

Protects string and bow nocks. Prevents untwisting of bowstring, keeps brace height correct. Made of leather and adjustable elastic strap. Fits any bow. (12 on a display card.)

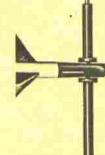

3580 ea. \$ 1.25

Bow Tip Protector

Self-conforming, wear-resistant rubber holds bowstring in place on lower limb. Protects decorative tips from damage. Fits any bow. (12 on a display card.)

7845 ea. \$.85

Nock Rite

Positions arrow immediately. Aids accurate shooting by preventing slippage of arrow on string. Balanced three-finger action assures smooth arrow release. No other finger protection necessary. (12 pairs on display card.)

7275 pr. \$ 1.40

No Glov

Positive nocking point between contoured rubber guides to eliminate need for glove or tab. For fast, accurate shooting regardless of weather. (12 on display card)

7273 \$ 1.50

Nok-Set

An aluminum band lined with a layer of live plastisol. Guaranteed not to slip. Gives positive, permanent nocking point. (12 pkgs. to card.)

7733 pkg. of 5 for \$ 1.50

7732 3 nok sets with pliers \$ 2.25

Nock Locks

Provides fast guide for positioning arrow consistently. (12 on display card.)

7270 pr. \$.80

Bear Nocking Points

Heat shrinks onto string. Gives an instant nocking point. 4 points per package. (18 packages on display card.)

3545 \$.75

arrow rests and accessories

Specially designed to provide the proper rest needed for various types of arrows and shooting styles. The rests are permanently inserted in leather plates. Will not separate regardless of use. Adhesive peel-back assures positive, easy installation. 10° angle. (12 on display card.)

Bear Bristle Rest

See page 24 for information on the Bear Premier Arrow Rest.

Bearhair Arrow Rest
Self-stick adhesive back. Thick mohair aids in smooth, quiet, quick draws and releases. (18 on display card.)
3550 ea. \$.50

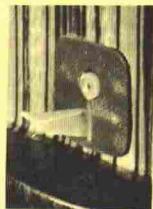

Feather Arrow Rest
Protects arrow crestring, gives frictionless release. For any bow with an arrow rest shelf. Five contoured feathers. Base 3/8" x 1 1/8". Height 1/4" Self-stick adhesive base. (12 on display card.)
1520 ea. \$.95

Bear Silent Arrow Plates
Adhesive-backed arrow plates stick on without trouble. Deadens sound of drawing hunting arrow. (18 on display card.)
3570 Pre-furred. . . \$.75
3575 Leather . . . \$.75

Bear Premier Flex-Rest
May be used in combination with Bear Premier Sight Plate or 6255 Premier Rest. Specify right or left handed. Self-adhesive backing, attaches easily. (12 on display card.)
7210 \$ 1.50

Hoyt Pro Rest
Non-interfering rest with pressure plate provides for positive clearance of vanes or feathers. Magic retaining finger prevents arrow from falling off rest. Flexible shelf prevents arrow bounce. Self-adhesive backing. Specify right or left handed. (12 in a carton.)
7283 \$ 1.50

Fred Bear Pin-on Compass
Liquid cushioned compass pins onto shirt pocket, tells direction at a glance. Waterproof and shockproof construction. Top unscrews to convert to pocket compass.
7110 \$ 5.50

Potawatomi Bow Square
Locates correct nocking point and bracing height. Helps many archers the first time used. Non-corrosive, anodized aluminum makes it lightweight, convenient.
7865 \$ 5.50

Bear Nylon Bow Square
Guaranteed, unbreakable nylon folds to compact size with clip for pocket or belt. Easy-to-read numbers for quick location of nocking points and check for proper fist-mele.
7870 \$ 3.25

Kissar Button
Provides for consistency of draw. Attaches to bowstring. Touches your lip each time to let you know you're at proper draw. 18 on display card.
7279 \$.90

Bear Shooting Glove Powder
Friction-free powder assures silk-smooth release when applied to shooting glove or tab. Spray on hand to dry perspiration and assure a secure bow grip. Handy 3/4 oz. squeeze bottle dispenser.
7211 ea. \$.75

Powder Pouch
Refillable pouch hooks on belt to keep powder at your fingertips. Made of leather with vinyl flap. Includes score card clip and pencil pocket.
3525 Brown, black, white, or smoked elk \$ 3.75

Score Card Clip
All leather, attractively trimmed in sheared calf. Fastens to belt. Has pencil pocket and spring clip to hold card. (12 on display card.)
3585 \$ 1.25

Smok-Clip
Made of safe, sanitary stainless steel. Metal loop easily attaches to handiest belt loop, pocket, etc. Holds cigarette safely when both hands are needed.
7213 \$ 1.95

Bear Bow Saddle
Soft leather pad cushions hand for comfortable, non-slip grip. Can be trimmed to fit any hand and bow contour. Adhesive peel-tab backing. (12 on display card.)
3540 \$ 1.00

No-Freez Klicker
Spring clicks audibly at full draw. Psychological "release mechanism" to prevent freezing. Improves shooting technique. Made of chrome-plated spring steel. Self mounted leather tab. (12 on display card.)
7281 \$ 1.95

New Saunders Bow Mate Klicker
Automatic click tells you when arrow reaches full draw thereby eliminating underdraw tendency. Pressure sensitive backing fits any standard arrow rest. NFAA-approved for bare bow competition.
7737 \$ 1.95

bow hunting clothing and accessories

New Bow and Arrow Nomenclature

Long a mixture of confusing and contradicting names, archery terminology has now been standardized. These are the official Standard Nomenclatures established and approved by the Archery Manufacturers Organization.

how to take care of your bow

Take care of your bow . . . while not in use, keep your bow unstrung. Hang it vertically or lay it across pegs supporting both limbs. Keep it in a bow case in a cool, dry spot.

When used in rain or snow, wipe dry before storing. In cold weather, flex bow several times to "warm it up." Occasionally, apply a light coat of furniture wax to protect finish.

To measure brace height (fistmele), measure at right angles to the string from the deepest cut in the handle on the face of the bow, below the arrow shelf.

The proper brace height for your bow (and for you) depends almost entirely on your shooting style and the conditions under which you are shooting. *The string supplied with your Bear bow is exactly the right size to give your bow best performance.* However there is no "set" brace height which will give you maximum performance every time. For example, as your bow "warms up" during a shooting session, any string will tend to stretch a bit. After a period of disuse, the string will return to its original length. For this reason alone, it is important that you "tune" your bowstring to your bow before (and sometimes during) each shooting session, bracing the bow at the brace height will give you:

1. Least wrist slap
2. Least string noise and vibration when shooting.
3. An arrow that does not wobble in flight.

Your brace height will never need to be lower than that provided by a fresh Bear bowstring, placed on the bow without twisting. To increase brace height, simply twist the string to shorten the length.

Stringing your Recurved Bow

Use the new 3-Bear Bowstringer recommended by top professional archer "Gentleman Jim" Pickering. Simply stand on the cord after attaching the Bowstringer to your bow tips. The tips bend as you pull up—ready for easy, safe stringing. Why take a chance on twisting your bow limbs and ruining your bow? Use the bowstringer used by the pros. For more information see page 31.

archery films in color and sound

Here's something for every archer, bowhunter—all who enjoy the outdoors—in these rare and exclusive sound-color films. Never before have you been able to obtain such a thrill-packed collection of motion pictures for your community.

These are a few groups that will welcome these films:

- Sportsmen's Clubs
- Archery Clubs
- Service Clubs
- Church Groups
- Boy and Girl Scout Troops
- Sport Shows
- Schools
- Open Houses
- Banquets
- Camps

Average runing time of these films is 15 minutes, making them ideal for club programming. Order two for a half-hour show. Rental fee is \$5.00 each. Check or money order must accompany request. We pay postage both ways. Reservations should be made one month in advance. Write: Grayling Film Service, Grayling, Michigan 49738.

1. Kaibab Bucks Exciting first bowhunt season in Arizona's Kaibab Forest.

2. Trophy Elk Off to Wyoming's Rockies with a bow in quest of royal elk.

***3. Backcountry Bowhunt** Going after North America's biggest game.

4. Prairie Pronghorn Bowhunting wary antelope on the Western plains.

5. Badland Bucks Skilled bowhunters outwit mule deer in North Dakota.

***6. North to Adventure** Record Stone sheep hunt in Canada.

7. Bowhunter's Safari Fred Bear hunts in French Equatorial Africa.

8. Bowfishing Fun Introduction to archery's fast-growing off-season sport.

9. The Art of Archery Basic instruction by experts on how to shoot.

***10. The Oldest Game** Thrilling pursuit of the wily white-tail deer.

11. B'wana Bowman Amazing story of elephant hunt in Africa's Congo.

12. Arrow for a Grizzly Bowhunter meets Grizzly in the Yukon wilds.

13. Grubstake Bowhunt Stalking beautiful Dall sheep in Alaska.

†14. ABC Television's American Sportsman Grizzly Hunt Featuring Fred Bear.

***15. Land of the Tiger** Fred Bear's successful search for the great Bengal tiger in exotic India.

***16. Kodiak Country** Breathtaking hunt of the huge Kodiak bear in Alaska.

***17. Fins, Feathers & Fur** The fast action of "off-season" sports for the bowman—bowfishing for the stingray and alligator gar, hunting for the bob cat and pheasant.

***18. Mozambique Game Trails** Exciting and unusual big game hunting in the wilds of East Africa. Stalking the nyala, impala, Greater Kudu, and waterbuck, climaxed with the bagging of a huge bull elephant.

†19. ABC Television's American Sportsman Fred Bear in his first successful attempt at a polar bear in Alaska. Part two an exciting stalk of a big buck mule deer in New Mexico. †(Note: cannot be used for television or paid audiences.)

***20. The Year of the Cape Buffalo** Fred Bear and professional hunter Wally Johnson successfully go after Africa's meanest game: the Cape Buffalo. Filmed in Mozambique.

**In two parts—12½ minutes each, on one reel. \$10.00 per reel. Write us about films for television use.*

How to Order A Bear Bow

Tell your Bear dealer your height, weight, age, whether you are right or left-handed, and whether you want tackle for hunting, target, or both. If no dealer is nearby, write us.

Prices are f.o.b. Grayling, and subject to change without notice. *Minimum order \$5.00* (Michigan residents only: if you send check with order, allow for 4% sales tax.) Dealers are requested to use Bear order blanks whenever possible.

Important: Normal Parcel Post restrictions do not apply to parcels being shipped to a RFD address. These packages may weigh up to 70 lbs. and have a maximum size of 100" (length plus girth).

how to tune your bow

In tournament archery, as well as in bowhunting, your ability to hit your target or game boils down to two factors. Your bow and your arrow.

Sound basic and fundamental? Well, that's what archery is. A sport of fundamentals. Master them and you'll be a top shooter.

Sure, it takes a great deal of time practicing your draw, anchor and release; hours of perfecting your aim and concentration. But none of it will do you any good unless your bow and your arrows are matched perfectly to each other and to you, the archer.

The biggest mistake most people make in selecting a bow, is choosing one with too much pull. This is particularly true of men. Pick a weight you can hold at full draw for ten seconds without quivering. Don't underestimate your strength, either. Once you've found a weight you're comfortable with and you're sure that any heavier load would be too difficult to hold, you're ready to select your arrows.

String Height is Important

Before you get your arrows, however, better check that bowstring. Information in measuring brace height and "tuning" your bowstring is covered in the section "How to Take Care of Your Bow" on this page.

Choosing the Proper Arrow

Selecting the proper length for your arrow is easily done. Using a special measuring arrow that's marked off in inches, take up your full draw. Your correct arrow length is the point at which the arrow stops in relation to the front of the arrow shelf. (See Illustration on page 21.)

Now that you know your draw length, you must match it to the weight of your bow. Most bows are weighed at 28". For each inch difference in draw length, add or subtract approximately two pounds of bow weight from the weight marked on the bow.

For example, if you have a 30" draw and you're shooting a 36 lb. bow, your bow weight is actually 40#. Similarly, if you have a 27" draw, your 36# bow is only drawing 34#.

Using your actual bow weight at your draw length, consult the arrow selection chart at your Bear dealer's. In a top quality aluminum arrow, such as the 1010 Bear-Easton Arrows, you could have several different weights to choose from. Select your weight according to arrow usage—indoor, field, or hunting.

The spine, or stiffness, of the arrow is also very important in proper selection. For example, an arrow that is of improper spine for your bow can shoot either right or left of target.

The spine of an arrow is the measured deflection, in inches, of the shaft when depressed by a two pound weight at its center. This flexibility, and its variation in various weights, is how arrows are matched to different weighted bows. Here again, your Bear dealer will help you match the proper spine and weight to your draw weight and length. With the proper spine, it is the weight of the arrow shaft that is the determining factor in arrow speed and trajectory.

Once you have all these factors matched up—bow, draw length, actual draw weight, spine and weight of the arrows—you must make sure they are kept consistent. This is what we mean by matched arrows. Each shaft is accurately weighed, with the proper wall thickness and the correct spine. In highest quality arrows, these tolerances are amazingly close. As you get into less expensive arrows, you have to allow for some variations.

Your own shooting situations will determine your arrow selection. If you are serious about winning in tournament archery, you can't afford to settle for less than the finest. (You can't do better than the 1010 Bear-Easton aluminum Arrows.) For intermediate archers and beginners, the Bear 1040 or 1060 arrows will serve you well.

Choosing the Right Accessories

There are many accessories which can be added to your bow to make you a consistent archer. Hunters and tournament shooters alike, can add sights, stabilizers, and a variety of other devices to their bows.

Once you have your arrows and accessories perfectly matched to your bow and to yourself, you must be their equal. Concentrate on the same draw, anchor, smooth release, and you'll be heading toward that perfect 300 score or that prize buck trophy!

bear guarantee

Every Bear Bow is numbered and accompanied by a registration card which must be filled out and mailed by the purchaser or his Bear Dealer within 10 days after date of purchase. Should failure occur in a bow so registered within a period of 6 months after date of purchase, the Bear Archery Company will make free repair, or replacement if repair is not feasible, unless the bow shows evidence of misuse or improper handling. The bow serial number must be intact.

After 6 months and up to one year after the purchase date and provided the bow has not been mis-used or mishandled, repair or replacement will be made for 25% of the list purchase price. From one year to 1½ years after purchase date, the charge will be 50% of the purchase price. From 1½ to 3 years the charge will be 75% of the purchase price.

No adjustment will be made until the damaged bow is returned to our factory for inspection. Replacement will be made with a bow of

the same model and weight, as near as possible. This guarantee is valid only when purchase has been made through an Authorized Bear Dealer. Dealers are not authorized to make adjustments, but they will be glad to handle the shipping and correspondence for you.

This warranty is transferable from one owner to another, provided bow is registered at time of purchase by original owner.
