

Cool machines in France

Hungry on Sunday when everything is closed or in the middle of the night? Use the bread distributor. Chose the type – baguette, rustic, etc – insert the money and voila!

Or how about a Pizza? Chose your type. Then decide if you want it hot (3 minutes) or cold (30 seconds),

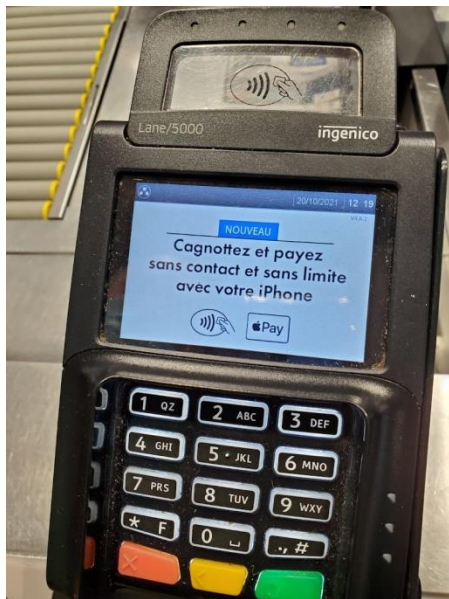

So, you've met a really hot girl and want to take her to you room, but all the pharmacies are closed . No problem cause there on the street wall is a condom dispenser – 3 condoms (of your choice color, texture etc) for 2 euros!

Afraid of someone stealing your grocery cart? Put the white disk in the slot, and the lock opens and free you cart. When your finished, put the chain into you cart and out pops the disk for the next time!

And to pay for it all, put your Carte Blu or Visa card into the bottom of the machine. But wait! There's Covid out there, so just wave your card over the top and you're charged touch free! The same at all highway tolls – fast and clean 😊

The card reader on the left is at the supermarket. On the right this card reader is used in every restaurant, café or shop. It's brought to your table.

And finally, though it's not a machine. We think Plane Trees are cool. The form are planted on each side of the road approaching even the smallest village, creating a cathedral effect. And we've found the smaller the village the longer the Plane tree approach up to a kilometer. And of course every square and park are filled with these beautiful trees.

Home October 30th! Chuck and Anzie/Anne
