

Fragrant Fresh Cut Trees

Premium Select 6' – 13'

Frasier Fir
Scotch Pine

How to Care for Your Tree

- Keep the tree outdoors, protected from wind and sun until ready to decorate.
 - Make a fresh straight cut across the trunk an inch or so above the original cut and immediately put in stand with boiling hot water and Tree Life.
 - These trees may drink between a pint and a gallon of the water and Tree Life solution a day. To keep your tree fresh and happy, check the water daily and add more when necessary.
 - Our recommendation is to keep the tree in a cool spot in your house.
 - It is important not to let the water level drop below the fresh cut. If this happens a new cut will be necessary. Keep a watchful eye!
