Re: E&J Energy Solutions, LLC.

To Whom It May Concern:

This letter is to serve as a reference for E&J Energy Solutions, LLC regarding the Houston Housing Authority (HHA) Energy Performance Contract project.

The HHA project consists of various energy efficiency improvements across sixteen multi-family properties, with the goal of reducing energy consumption and improving quality of life for residents. The project has a total value of \$25MM with lighting efficiency improvements accounting for the most significant amount of scope. E&J played a major role for all lighting work during development, audit, and lighting equipment recommendations. E&J continue to be a vital asset to Siemens as technical experts and consultants during execution phase.

Siemens is very pleased with the knowledge, professionalism, and work of E&J, and we would recommend the company to other firms.

Please feel free to contact me if you have any questions or wish to discuss my experience working with E&J Solutions further.

Sincerely,

Rey Ruiz, PMP
Project Manager
