Callie

Oscar

Meet Callie and Oscar, they are litter mates born on 8/8/2008 and have been together since conception and will be adopted out together as a bonded pair.

They are both special needs dogs and are looking for a **FUR-EVER** home where they will continue to be well cared for and loved.

Callie had major back surgery on 3/14/2014 and could not walk. Through a lot of swimming pool therapy, she started walking in about 4 months and now can even run (but no jumping).

Oscar is blind. It does not seem to bother him much, and he is fearless and not bothered by running into things. He loves walks and always leads (just have to guide him with the leash).

They enjoy lots of lap love.

Callie had a major dental done on her, and they have both been spayed/neutered and are up to date on their shots.
