RESEARCH

Interests

Strategic leadership; corporate governance; behavioral strategy; managerial discretion; executive characteristics and experiences; executive succession

Summary

My research interests lie in the field of strategic management, with an emphasis on strategic leadership, the study of senior executives and their effects on organizational outcomes. Most of my work examines managerial discretion, the extent to which executives are able to influence their firms' strategic actions and eventual performance outcomes. I am also interested in the topics of executive characteristics, corporate governance, and behavioral strategy. My current work in this domain examines how CEOs' personal characteristics and experiences affect the nature of firm-level strategic decisions and behaviors.
