

Our Bumblebee Classroom

The Preschool Program at Sunnyfields encourages our students to grow and learn in an environment that's filled with exciting and fun activities! All of the key learning skills (social, verbal, cognitive, and physical) are focused on through lessons such as counting out loud, how many students there are for attendance, identifying the letters of each child's name during morning circle, reviewing the weather and days of the week, learning to cooperate by assembling large floor puzzles in groups, focusing on a Letter, Number, Color, & Shape of the week! Twice a year our teachers use assessments to identify each child's educational needs and then plan specific, one-on-one lessons with workbooks, projects, and/or hands-on activities to help every child meet his or her learning goals!
