

# Stickman No. 28 Puzzlebox (Edelweiss)

Over the years, I have dedicated boxes to such popular genera as sliding tile, interlocking Kumiki, padlock, and threaded Hoffmann style puzzles. In similar manner, the Edelweiss Puzzlebox has now become the Stickman tribute to the popular genera of tray puzzle designs.

To accomplish proper justice for this project, I enlisted the help of William Waite, who is the most profound puzzle tray designer I know. It took a bit of tinkering to create a tray puzzle that worked as the key to solving a puzzlebox, but together we managed a design that is just as unique and challenging as it is exceptional.

The puzzlebox is called the Edelweiss after a flower native to the Swiss Alps. The tray puzzle, when solved, resembles this flower and will unlock one of its secret compartments. Because this flower often blooms while snow is still on the ground, puzzle pieces can also be solved to produce a snowflake, which will open another of its secret compartments.

The 10 tray pieces of this puzzle look simple, but their solution is “*exceptionally challenging*”. Because of this, the puzzle also comes with a hint to solving the main puzzle, if you can discover it.

The Stickman Edelweiss Puzzlebox is roughly 5” x 5” x 3”, and comes with its own 6-page fully-illustrated instruction book. It is hallmarked with the Stickman logo, and limited in edition to 100 completed copies.

**Limited Edition Status:** Limited to 100.

**Production Dates:** (Jan. 2015 – Aug. 2015)

**Original Sale Price:** \$327.

**Variations:** Maple, with versions of leopardwood, walnut & bloodwood.

**Size:** 7” x 7” x 5”.

**Number of Compartments:** 2

**Number of Steps:** N/A (Dependant on tray puzzle solutions.)

**Difficulty Level:** Difficult

**Instruction Book:** 6-pages, illustrated.

**Special features:** Reprogrammable magnetic locks.

**Goal:** Open two secret chambers.
