

PRODUCT DATA SHEETS

DIGEST – LIQUID BACTERIA/ENZYME

DESCRIPTION

This is a multi-purpose, liquid bacteria/enzyme complex designed to counteract offensive odors from public restrooms, septic tanks, ponds and lagoons as well as homes, animal hospitals and kennels. Regular usage will keep open and maintain drain lines.

FEATURES

- **NON-TOXIC, NON-CORROSIVE AND ENVIRONMENTALLY SOUND**
- **NON-PATHOGENIC AND pH NEUTRAL**
- **NO MIXING, NO MESS**
- **INSTANT ODOR CONTROL**

Accepted by USDA for use in Federally inspected food processing plants.

USE AND DIRECTIONS

ODOR AND STAIN REMOVER FOR CARPET AND UPHOLSTERY: Spray stain with **DIGEST** liberally. Blot stain with clean white rag. Reapply product liberally & cover area with clean damp cloth. Leave area covered for 6-12 hours. Remove cloth, rinse & blot dry, stain & odor are now biologically eliminated.

ODOR ELIMINATOR FOR GROUTING, FLOORS, AND URINALS: Shake well before using. Insert sprayer, spray organic materials & decomposed salts associated with urine to eliminate odors. Area should be kept moist or use lukewarm water on the area to be treated.

GREASE TRAPS (RESTAURANTS, INSTITUTIONAL KITCHENS): Pump out trap, add directly to trap 1 pt. per 24 cu. ft. capacity (180 gal). One week later, begin preventative maintenance schedule. At close of day, flush each drain leading to trap for 5 seconds to clear lines. Dilute ½ pint with 1 qt. of lukewarm water & pour approximately half of the solution down each drain. Let mixture remain in drains overnight. Next morning, flush lukewarm water down drains for 5 seconds. For traps with “top crust” visibility, add 1 pt. per 24 cu. ft. (180 gal) directly to grease trap. Repeat every 3 or 4 days until crust disappears. Begin preventative maintenance schedule.
