

Dear Sirs,

My name is Jack Douglas. I am a producer, audio engineer, musician, film composer and professor at Expression Collage for Digital Arts in Emeryville Ca. I have produced many artists including John Lennon, Aerosmith, Cheap Trick, The Trews, Patty Smith, Allen Ginsberg and Supertramp to name a few. I have worked as an engineer with artists like Bob Dylan, George Harrison, Miles Davis, Judy Collins, Blue Oyster Cult and many, many others. I have scored films and TV shows and designed sound for Disney. I have been a professional in the music arts for almost 50 years. I have known Corey Macfadyen since his childhood. I worked with his father Lachlan in a band in the mid 60's. Corey has developed into a fine engineer/producer and his knowledge of the entire spectrum of the technology and art of making music is world class. His teaching skills are sharp and I am sure he would be a great asset to any institution.

Thank You,

Jack Douglas
