1. Write an expression to represent the statement. Then evaluate the expression.

$$\frac{7}{9} \text{ of the difference between } \frac{2}{3} \text{ and } \frac{1}{4}$$

Expression:

Value:

2. Use >, =, or < to compare. Explain how you can compare without evaluating.

$$\frac{2}{3} \times \left(7 \div \frac{1}{9}\right) \text{ \_\_\_\_\_ } \frac{4}{6} \text{ of the quotient of } \frac{1}{9} \text{ and } 7$$
