

SKU001 Long Step, Above Frame Mounted

- Specifications:
- Two mounting locations per side
 - Mounts must be located 48-63" apart
 - Step is 84" long and 36" above the ground
 - 250 lb weight capacity

- Applications:
- Single or Dual axle trailers
 - The step spans the wheel fender
 - To be used by first stepping on the trailer frame, a trailer step, or a Guide-on Step "Step 2" SKU004

Brackets for mounting are designed to hold onto three sides of the trailer frame and works good for mounting Guide-on Step above an integral step of the trailer.

Do not flip the mounting brackets.
