Helpful Tip

We know and understand that life is very busy for our parents, allowing your child to do things for themselves ie: getting dressed, putting their own jackets on, feeding themselves, putting away their toys not only build their confidence but will also make your life a little less stressful. These are skills we work on everyday at school and should be easy to accomplish at home.

Please read to your children 10-20 minutes a day. Also while reading, talk with your child, ask questions, and engage with your child about the story you are reading.
