

What is Order?

The simplest explanation is Order is Harmony with all sentient beings; within and without us. Harmony creates an Orchestra that gives a sweet symphony to the cosmic portal of the soul. When one embraces the play, the Harmony begins to flow from the expression's now. Order has no-energy, it is boundless; consisting of all-things in cosmic field. The field of Order can be computed; it can be Absolute Order, or it can be Order reforming the ideal no-energy system. Order would be a field in which geometric sequences and patterns arise due to the infinite amount formed. This gives Order; nothing; nothingness, a state of Absolute, a reality to form through the Formless into Form. For Order consists of the re-emergence of information as the system of Order tries to form Harmony into all systems at once. Order comes from thought, comes from reason, comes from spirit; it comes from animals, it comes from plants, it comes from mineral, all things are inherent with the essence of Order. For in order to evolve, one must become adapted to the new current; for the old flow does not always make it back to the Ocean.
