

BETHEL MEMORIAL BRICK PROJECT

In a continuing effort to complete the restoration of Bethel Church on Bethel Road, the front steps and entrance to the church building will be covered with individual engraved memorial brick pavers. We can use this opportunity to memorialize our families and loved ones that have been a part of this special place! ALL proceeds from the sale of these bricks will go directly into the continued restoration of the building.

The paving stone company out of Edmond, OK has been used by the Hydro Fair and Southwestern Oklahoma State University with a great deal of beauty and success. The pavers chosen will be a red brick color used in outdoor applications for long term durability and esthetics.

Along with this flyer you will find 3 order forms for the 3 different sized and priced pavers. Each order form has the specifics of the 3 different bricks. All 3 sizes are pictured below in an actual photo from the Hydro Fair Bridge done with the same 3 sizes to be used at Bethel.

You can find a copy of this flyer and all order forms online at

www.bethelchurchonbethelroad.com

or at various businesses around the Hinton and Hydro areas.
