

Date: January 23, 2020	Presentor: Ed Miltner, P.E.
Location: US Bank Building, 101 S Capitol Blvd., 2 nd Floor in Room 200.	Topic: FHWA's Idaho Division and Bridge Program
Duration: 1 hour	

Description:

Ed will give an overview of FHWA's Idaho Division and several bridge program topics. These topics include: Bridge Asset Management, Bridge Performance, Bridge Inspection Program, and facts about the National Bridge Inventory with some emphasis on Idaho bridges. He will also provide a demonstration of the InfoBridge portal and how that tool can be used to obtain information about the Nation's public highway bridges. There will be time to ask questions as well.

Date: October 29, 2020 Location: Virtual - Microsoft Teams Duration: 1 hour	Presentor: Bill Gates, PhD., P.E. and Janet Zarate, P.E. Topic: US 95 Emergency Rockfall Assessment & Mitigation
Description: US 95 at MP 188, about 5	miles south of Riggins, Idaho, has experienced repeated rockslides,
including several notable failures since D	becember 2012. These rockslides originated from an ultramafic rock
massif consisting of very strong and hard	d green serpentinite cut by weak bands of schist. At this location, the
rock face towers about 250 feet above to	he highway with a total slope length of approximately 800 feet in
length along the highway. The most rece	ent failure occurred on July 3, 2020, as the rock mass adjacent to the
2012 failure deposited 10,000 cy of rock	onto the roadway, blocking it. This failure was followed by a
second failure on July 10, which deposited	ed an additional 10,000 cy of rock on the highway. McMillen Jacobs
was contacted on July 4th to provide em	hergency response, assessment, and mitigation services.
