Audio • Video • Surveillance • Control

3137 Biglerville Road
Biglerville, PA 17307
717-677-8770

Pennsylvania Medical Society contacted us to install a new audio and video system in their boardroom. To control the system, an All-in-one touchscreen panel was installed.

The audio system features the JBL ceiling speakers which provides premium performance in background, foreground music sound systems. The superbly engineered Sennheiser shotgun microphones facilitate all possible installation configurations and are perfectly at home for meetings and teleconferencing. An audio recorder allows the meetings to be captured and downloaded straight to the server.

The video projection is created with a Hitachi 6500 lumen projector and is projected on a Dalite Cinema Contour HD Screen. A Vaddio camera system was installed for video conferencing. As the world's first broadcast-quality HD PTZ camera with USB 2.0 output, Ethernet (control & streaming) and analog component (YPbPr) outputs built right into the camera, it captures a wide angle of view (58.1°) to view everyone at a conference room table.

Features:

- Sennheiser i42-L mini shotgun Microphones
- BSS BLU 160 Processor /BLU 102
- All-in-one PC touchscreen for room control
- Crown DCi 4 | 300N Power Amplifier
- JBL Control 26C 6.5" vented ceiling speakers
- D&M DN-700R recorder
- Hitachi CP-WX8265 6500 lumen projector
- Dalite Cinema Contour HD Screen
