

DataWorks Business Services Industry Solutions & Customer Experiences

We Help Business Services Companies Take What Makes Them Special And Strategically Assist Them In Leveraging The Latest Cloud Computing Technologies To Deliver Their Products & Services; Better, Faster, and More Cost Effectively To Their Customers

Business Services Firm (Aircraft Industry) In Need Of More Updated, Scalable, & Cost Effective IT Systems Infrastructure & Applications To Help Them Keep Up With Their Growing

Customer Business: Hired DataWorks to evaluate their existing IT Systems and applications and make recommendations on more updated, more scalable, and more cost effective IT Infrastructure solutions to run their aircraft services business. DataWorks recommended the Microsoft Office 365 Cloud Computing Suite which included secure & enterprise level; office suite apps, email, document management & collaboration, Skype web conferencing, and Microsoft Azure Cloud IT Infrastructure Solutions for backing up all of their data & disaster recovery systems securely off site. DataWorks was also hired to implement a Cloud PBX Telephone System that would seamlessly tie together their various departments, geographically dispersed offices, and off site employees. DataWorks also provides this customer with both IT Help Desk & On site Support Services for their main IT Systems business servers, security firewall, and computer users.

Established Financial Services Software Firm In Need Of

Updating Their IT Systems & Applications: Selected DataWorks to work with their internal IT Team on new special projects, to help them improve key IT Systems & applications that were no longer meeting their business needs as the company grew and changed directions into new products and new markets. DataWorks worked with the internal IT Team to; update their email with better security & reliability, update and consolidate their different versions of Office Suite Apps amongst employees and departments, and to update their data backup and IT systems with new off site cloud based solutions that were more reliable and scalable than their existing legacy backup systems. DataWorks also provides this customer with escalated IT Support Services for their main IT Systems business servers, security firewall, and remote connectivity support for their off site employees.
