

Preparing For SCCC Using JpegSizer Pro® V7.2

1. Open JpegSizer Pro program
Click on “Add new profile”
2. Name new settings “SCCC”
3. Click on “**Dimensions**”
and set to:
Resize by height and width
Width 1024, Height 768
Enlarge images if smaller
Exchange Width and Height for best fit to each image
Recommended for printing individual photos
Fitting rule “Best Fit”
Add Border - 10 pixels, color - white
4. Click on “**Captions**”
No captions
5. Click on “**Format**”
Select “JPEG”
Quality set to 90
Resampling Algorithm - “Bicubic”
6. Click on “**FileNames**”
Set Filename rules to “Add prefix and/or suffix...”
Prefix: 28-YOUR SCCC ID-A%NIImage Title
Filename extensions set to “JPG”
7. Click on “**Saving Files**”
Use “browse” to locate folder where you want your images saved after resizing.
HINT: Before starting create a folder named SCCC DPI and save your resized images in this folder.
8. Save these resize settings. Follow the instructions with the program for using the “SCCC” settings that you created to prepare your images for competition.
