

Mt. Baker 'Reach for the Top' – July 10, 2011

Today 11 runners and one walker ascended Mt. Baker for the annual "Reach for the Top" event. The views were spectacular.

The actual times follow the name. The column after that is the time adjusted for age. The factor used to adjust the actual run time was shamelessly plagiarized from the [Round the Mountain](#) results. My apologies if I have done something wrong here (?copyright infringement) but I would hope that these figures are more or less in the public domain. The factor reflects a comparison of results from different age groups as seen in World Masters competition, at least that is my simplistic understanding of it. I have no recorded age for Candi Huscroft or Al Freeze, thus their age is guesstimated.

Congratulations to our two winners: Candi Huscroft and Joel Robison. And thanks to all the volunteers including Jo Ellen Floer, Barbara Robertson, Marianne Nahm, Corinne Ferrier, Gary Billmark and Aden, Fred Clark and Clem's son (?Paul). Oops, my dementia showing again.

Name	Age	Actual Time	Master's adjusted time

PS: For those who are wondering, Judith and Howard made it down the trail on their bikes, although got a bit off course at one point. They arrived very hungry after everyone else had gone.
