

THE CLIMATE OF COPENHAGEN (DENMARK)

A. Answer the following questions in sentences.

1. Which hemisphere is the climate in ?
2. What is the mean annual temperature ?
3. What is the annual temperature range ?
4. What is the total annual rainfall ?
5. In which season does most rain fall ?

B. Copy and complete the following description.

The climate of Denmark is similar to the climate we get in the east of England, but it is a little colder in the winter. The average (mean) temperature is _____ C, this is a moderate temperature. The hottest month is _____ with a temperature of _____ C and the coldest months are _____ and _____ with a temperature of _____ C. This gives an annual temperature range of _____ C.

The total annual rainfall is _____ mm, a figure which is quite low for a dairy farming country. The rainfall is fairly evenly spread with the lowest amount for any month being _____ mm in _____ and the highest _____ mm in _____. Slightly more rain falls in the _____ season, especially during the months of _____ and _____.

C. Why is this climate not very good for dairy farming ?

D.
