## Welcome To Our 2015 Newsletter *Box Truck Business case*

### Box Trucks Frames Fabricated with the TS22 Extrusion

#### Business Case: University of Central Oklahoma

##### Objective:

Give a fresh look to a Box Truck owned by the **University of Central Oklahoma** and at a reasonable price.

Our tension frame based on the TS22 extrusion was chosen for this box truck project for the following reasons:

- 1) Impeccably stretched vinyl banners (See hereafter photo)
- 2) Easy to change printed graphics
- 2) Unbeatable cost-effectiveness.

[Send us an Email](#)

[Subscribe To Our Newsletter](#)

All our aluminum and PVC extrusions are 100% recyclable.

Our entire aluminum and PVC extrusion product line is designed and manufactured in the USA.

How does it work?  
Have a look to our video...

[Ask For A Free Quote](#)

This neat installation was realized by Vital Sign Oklahoma ([www.vitalsignsok.com](http://www.vitalsignsok.com)). You can see the perfect stretch of the printed vinyl. Goodbye to rivets, bars, etc and Hello to easy graphic changes.

Note that the up left corner was cut to follow the truck structure. This is not an issue with our Banner stretching system. It works fine even for non-rectangular frames.

**Let's talk cost:**

(Material cost for two frames - both sides of the truck - \$495.00, including shipping)

**Or *less than \$250.00 per frame delivered to your shop!***
