COLLECTION

MADE IN ITALY

History.

The gamble paid off.

The W-Lamp brand was born in the US in 2013, and in July 2014 in Italy, for a bet almost impossible: design a pack to cover a box containing a bottle of wine, which could have a second life. So here is the first prototype made of three elements: a cardboard base containing the electrical cable, the bottle of wine with its box and a paper box that can be used as lamp shade which becomes a vehicle of communication and design for the bottle of wine.

The gamble paid off and the rest is history. 80 different subjects, divided into categories.

W-lamp paid a high attention to the lamp shade details. The packing is made of recycled cardboard and the selection of the paper for the lights is done in a rigorous manner and in close cooperation with leading Italian most important paper manufactures.

The result is a product that combines the Italian creativity with advanced production technologies. The products also have passed all laboratory tests necessary to obtain the safety certifications for both the European market (TUV in Germany) and the US market (UL, Underwriters Laboratories) obtaining eligibility for sale also outside Italy.

Made in Italy.

impose its own Italian uniqueness

Each W-Lamp is entirely Made in Italy and assembled by hand, for which reason some imperfections are not to be considered a defect but a virtue, a symbol of uniqueness.

The FSC® logo identifies products containing wood from forests managed correctly and responsible according to strict standards environmental, social and economic.

The forest of origin it has been tested and evaluated according to these standards (principles and criteria of good forest management), established and approved by the Forest Stewardship Council® a.c. through the participation and consent of the parties concerned.

Packaging.

with style

The packaging structure is to carry thanks to its top handle. Its shape has been specially designed to take a very little space, while its beauty is due the use of recycled paper and the care details.

Also the choice of the window on the front It has been specially designed with the aim of allowing to recognize immediately the subject that contains, subject that has been also printed on the label hung on the packing. Each pack contains a base, a lamp shade, an electric cable and the instructions for the assembling.

Assemble a W-Lamp is very easy and it takes about 15 seconds. The W-Lamp are a perfect gift idea for everyone.

Assembly.
All in 15 seconds!

Easy to assemble, they are composed of three simple elements: a base of cardboard, an electric cord and a cardboard shade.
Absolutely unique in their kind.

Displays.

Counter display

Made of 1 mm cardboard.

To be placed on the counter, it signals the presence of the W-Lamp product to the public and presents it in a simple and exciting way. Easy to assemble, size 21x32x10 cm.

BACK

Column display

Made of 1 cm honeycomb cardboard to guarantee resistance to wear. Contains 24 lamps, with the possibility of exposing the open product on the final shelf. Easy to assemble, dimensions 41x41x164 cm.
