

NEED YOUR HELP!

We're organizing a South Miami-Dade Walk for Water to be held on Monday, April 29th, at 6pm. We will depart from the South Parking Lot of St. Thomas Lutheran Church at 17700 Old Cutler Road, and walk less than two miles roundtrip, to the Peoples Dock at Deering Estate. Our goal is to promote awareness of the global water crisis while raising funds to provide sustainable safe water around the world. While we recognize not everyone may be physically able to walk, there are still plenty of ways for you to participate.

Please pick up a Project Description Donation Sheet in the Narthex and take it to a local business of your choice and ask if they will sponsor our event. We will gladly put their name on our Walk for Water tee shirts.

Bronze Level: \$100. Silver Level: \$300. Gold Level: \$500.

Ask your friends & family to personally sponsor you and donate. Visit watermission.org to make a donation to our South Miami-Dade Walk for Water team. We will need volunteers to cheer our team on, to staff our rest areas, pass out water, and carry poster signs. Plan to walk or volunteer? Sign up in the Fellowship Hall!

Charity Navigator has awarded Water Mission it's **top-4-star rating 11 years in a row**, a distinction shared by less than one percent of the charities rated by the organization.

WE BUILD SAFE WATER SOLUTIONS THAT BREAK THROUGH THE GLOBAL WATER CRISIS.

The global water crisis is real and it is devastating. 842,000 people die every year — 2,300 people every day — due to diarrhea caused by inadequate drinking water, sanitation, and hygiene. The Water Mission™ organization is a Christian engineering nonprofit that designs, builds, and implements safe water, sanitation, and hygiene (WASH) solutions. Since 2001, we have provided access to safe water for more than 3.6 million people. Motivated by our Christian faith,

Water Mission serves everyone regardless of age, race, gender, or religion. **HOW WE WORK** We design customized solutions for each community we serve, and we partner with the recipients throughout the process. A successful project results in improved health, education, and productivity. **WHEN WE WORK** We provide solutions for those who live in communities around the world that lack safe water and sanitation and those who are suffering as a result of a disaster or emergency situation. **WHERE WE WORK** We provide solutions in more than 55 countries and have 250 staff members working around the world. We build safe water solutions that break through the global water crisis.
