

BATSNER CO. SINCE 1919

BATSNER COMPANY

a division of Henry M. Wood Company WWW.BATSNER.COM

Bulk Materials Handling Equipment • Level and Inventory Control Equipment • Process Controls
Flame and Toxic Gas Detection Equipment

Batsner Material Handling

Self-lapping metal disc valves for dry bulk materials and slurries.

The Smart Elbow® for pneumatic and slurry conveying systems virtually eliminates elbow wear, product degradation, plugging, surging, cross-contamination, noise, turbulence, etc.

Dry Material Handling including Helix® Flexible Screw Conveyors, Tubular Drag Conveyors, PosiPortion® Feeders, MiniVac® Pneumatic Conveyors, Bulk Bag Fillers, Bulk Bag Unloaders, Bag Dump Stations and Bag Compactors for all segments of industry.

Affordable Storage and Dispensing Systems.
Complete engineering for both manual and complete automation.

Pneumatic Conveying, Automated Packaging and Bagging Systems.

Dilute, Dense & Eco Phase Conveying. Rotary Airlock Feeders. Blower Packages. Valves & Gates. Valve Bagging Equipment. Open Mouth Bagging Equipment. IBC Loading and Unloading. Automated Packaging Equipment. Palletizing & Container Handling. Robotic Automation. Components & Spare Parts.

Manufacturers of Batch, Continuous, Hi-Intensity Mixers, Size Reduction, Shredder and Pulverizer Equipment and De-Lumpers.

Solving material handling problems that no other valve can handle.
Plattco's Double Flap Airlock® System ensures the seal is never broken.

Fully pneumatic vacuum conveying. Standard systems constructed with stainless steel with food grade 3-A systems and carbon steel options. Innovating COAX technology to advance Venturi's Principle for versatility and increased performance pump operation.

Product Separation for the pharmaceutical, chemical, plastic and food industry and all others where material screening is required. Designed for both dry and liquid applications.

Batsner Safety and Instrumentation

Single point and continuous sensors for bulk materials.

Flame, Gas and Smoke Detection.
Certified Safety Instrumented Systems that are reliable, functional and flexible.

Light Curtains, safety mats, two-hand controls and safety PLC/HUB.

Punch press automation.

Ultrasonic Point and Continuous Level. Volume and Flow Measurement and Control.
Solid and Liquid Level Switches.

Single point tip switch level sensors with dampened response for severe applications.

"Ears" for Grinding Mills and Differential Speed Detection.

Batsner Environmental

Skimmers to recover all types of floating waste oils, fats and greases.
