AUDIO
PRODUCTS

Equipment Racks • Speaker Stands • Turntable Shelves
Audiophile Accessories

Target Audio Products is a historic name among audiophiles. Today's Target is designed and manufactured in Ontario Canada with premium material to exact specifications to ensure your electronics and loudspeakers look and perform at their best.

Target offers a full collection of fine quality of audio accessories including equipment stands, loudspeaker stands, turntable wall mount shelf, isolation shelves and more. Target isn't simply

furniture like many other audio brands. Each component is engineered to provide a stable platform, superb vibration resistance, outstanding durability and utilitarian good looks without the excess that drives up the cost of many other audio accessories. All Target products are constructed of rugged black painted steel.

Regardless of the price of your equipment, it is our sincere hope that you will find Target products essential additions to your audio system.

VW Wall Mount Shelf

Turntables placed on tables or even on top of equipment racks can be susceptible to vibration transmitted through the floor due to walking or even feedback from bass drivers in loudspeakers. The ultimate solution is to place your turntable on the wall. The VW steel frame screws directly to your studs, and the shelf insert sits on four up-turned spikes to give your turntable superb isolation.

Shelf insert dimensions: 17.75" wide, 13.75" deep

Overall dimensions: 18.5" from wall x 20" W x 9" H

Includes: Steel frame, MDF shelf insert, 4 anchors and screws, isolation spikes.

ESV Equipment Shelves

These steel stands are rugged and functional yet attractive. Available in two heights, the ESV racks come with 3 CS shelves each. The ESV-60 (a 24" tall stand) can accommodate 2 more shelves, and the ESV-90 (a 36" tall stand) can accommodate up to 3 more. Each shelf bolts solidly to the risers for a very high maximum load and ultimate rigidity.

Accommodates equipment up to 19" wide

Overall dimensions: 24" or 36" tall x 24" wide x 16" deep

Includes: 4 steel legs, 3 CS component shelves, bolts, assembly instructions, plastic feet for rack risers.

Options: additional CS shelves, IS shelves, spikes and casters for feet, spike footers

IS Isolation Shelves

For vibration sensitive components, add an IS shelf to your ESV rack. Compared to the stock CS shelves, the steel frame is heavier, and the shelf insert sits upon threaded up-turned spikes. Most often, the IS shelf is placed in the top position and used with a turntable or tube electronics sensitive to vibrations.

AS Amplifier Stand

Get your amplifier and power conditioner off the floor with the Target AS. The AS is the same shape and size as the CS component shelves that come on the ESV equipment stands. AS can also be used with chrome Bling Thing carpet spike as shown.

FS HS HR MR Loudspeaker Stands

Bookshelf loudspeakers were never really meant to be placed on the bookshelf. When set upon a speaker stand and placed properly in the room, they can have neutral tone, great clarity, and a holographic sound stage. Target speaker stands are available in 4 varieties and 3 heights each so there is an appropriate model for nearly any bookshelf speaker you choose.

FS series are the least expensive and feature two cylindrical columns. HS stands feature a heavier square profile riser. HR stands are heavier yet and include two rectangular profile risers. MR stands are the most rigid and feature 4 rectangular risers plus a thicker bottom plate. All stands are fillable with mass loading media such as shot or aquarium rocks. Sand is not recommended.

Generally, the larger and heavier your speaker, the heavier the stand you are recommended to use. An optional top plate is available for the MR stand that permits mounting Bryston Mini T loudspeakers using the speakers' existing threaded holes.

Specifications

Heights Available: 50cm/20", 60cm/24", 70cm/28"

Top Plate Dimensions: 6" x 8", 0.09" thick (MR 0.125" thick)

Base Dimensions: 9" x 11", 0.187" thick (MR 0.25" thick)

Includes: Bolts, wrench, carpet spikes, isolation spikes, rubber pads, assembly instructions

Spike Shoes Floor Protectors

When using loudspeakers or equipment stands with spikes on hard floors, protect your floors with Spike Shoes. The steel disc has a dense rubber pad beneath that keeps your stand or speaker in place but prevents damage to your floors. Available in kits of 4.

Bling Thing Spikes Stance Plates Stabilizer Bars

Dress up the appearance of your Target loudspeaker stands with a Bling Thing chrome spike kit. The BT2.0 version includes top chrome thread covers. BT1.0 does not. Can be used with or without Stance Plates.

Expand the footprint for greater stability with Stance Plates. These bars attach to your existing stands to spread the footprint 2 inches in each direction.
