

RollEase®

You don't need to work out to lift more weight!

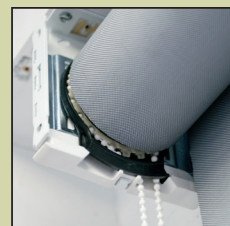

We made it easy to lift more weight than any manual shade lift system in the industry!

RollEase® is proud to introduce the new G400 Spring Assist™, the first manual lift system optimized for shades wider than 12 feet (3.7m). In combining the G400 clutch with our Spring Assist technology, you can raise a 16' x 12' (4.9m x 3.7m)* Roller Shade with a very comfortable pull force of about 6lbs (2.7kg). Available for use on 2-1/2" (63mm) and 3-1/4" (83mm) tubes, this system can accommodate shades previously only operable using a motorized system. For customers with larger windows and a smaller budget, the G400 Spring Assist is the answer.

* Consider fabric weight: 13.20oz/sq yd. and internal hem bar weight: 0.15lbs/ft.
