A Smart Way To Think About
Small Format Interchangeable Cores

1] **SAVE MONEY**

Our SFIC range is manufactured to high quality standards to offer you maximum value at competitive prices with overall low cost of ownership.

2] **SEAMLESSLY TRANSITION**

Our cores are made to exact specifications to be compatible with your existing hardware. We have keyways to match existing master key systems, and our cores are compatible with the equipment and parts you have on hand.

3] **UPGRADE TO PATENTED KEY CONTROL**

Our system of true key control offers the highest possible protection combined with superior keying capabilities. A simple upgrade to KeyMark x4 gives you patented protection against unauthorized duplicate keys until 2027.

4] **REDUCE LOSS AND LIABILITY**

NEXGEN XT packs audit and scheduling into a small format interchangeable core to provide accountability, along with flexible electronic master keying capabilities, to protect sensitive or critical areas without changing hardware or costly hard wiring.

5] **INCREASE QUALITY**

The Smart SFIC product family is created in a state-of-the-art U.S. manufacturing facility for consistent quality and reliability.

6] **PEACE OF MIND**

Our extensive network of distributors, service centers and dealers offers unprecedented accessibility and expertise to provide you with unmatched service, when and how you need it.

Make the change.
