

IES 2014

Call for Invited Sessions

The Organizing Committee invites academics, researchers, and professionals in the area of Intelligent and Evolutionary Systems to propose special sessions for IES 2014 to be held from November 10-12 in Singapore.

Proposal Preparation

Special sessions provide the opportunity for closer discussion along focused themes pertaining to exciting and emerging topics. If you intend to propose and organize a special session, please prepare a self-contained and comprehensive proposal with the following information in PDF format:

- Title of proposed Special Session
- Brief description of area of coverage
- Name and contact information of two (or more) Special Session Organizers
- List of potential authors and their affiliations

Organization Process

Special session papers submitted will undergo the same rigorous peer review process as regular papers. The Special Session Organizers are responsible for selection of reviewers and ensuring at least 2 reviews are received per paper. A minimum of 5 papers is required for each session. If a session has too few papers, accepted papers will be allocated to regular sessions wherever possible.

Submission Procedure

Please send your proposal in PDF format to Special Sessions Chair Prof. Justin PANG (justinpang@nus.edu.sg). The submission deadline is **1 August 2014**.
