## "Do humans have an innate ability to experience extraterrestrial contact?"

Historically, we spent over 60 years questioning the reality UFOs and the Extraterrestrial Presence on our planet, only to discover that the answer lies within our human nature—our Exoconsciousness. The *unidentified* (UFO) is within us. When we acknowledge this we begin living as Exoconscious Beings.

**Exoconsciousness is a new normal. Exoconscious humans possess multi-dimensional minds, high psychic abilities, healthy emotions, and a unified body-mind-spirit energy.**

At its heart, Exoconsciousness is a social, cultural movement that joins with consciousness scientists, energy healers, spiritual beings, paranormal researchers and near death experiencers to transform how we humans know ourselves.

### About Rebecca

Rebecca founded the **Institute For Exoconsciousness** to research and apply the abilities of human consciousness, sourced in extraterrestrial contact.

Rebecca created the concept of Exoconsciousness. Her signature is bridging consciousness science and ET experiencers. As a researcher, speaker and writer, Rebecca collaborates with scientists from Quantrek and the Institute of Noetic Sciences. She teaches Exoconsciousness and is on the faculty of International Metaphysical University (IMU). Rebecca is a frequent guest on radio talk shows, appears in films and is a featured keynote speaker.

Exoconsciousness: Your 21st Century Mind invites readers to advance their consciousness beyond earthly pursuits, beckoning them toward an extraterrestrial identity.

As Rebecca says “Where the mind travels, the body and emotions follow.”

“Rebecca presents ideas in an original and creative way”  
~ Alan Steinfeld,  
Summit on Spirituality  
and Social Change
