

April 12, 2019

**Dairy Together Roadshow Coming to California
Monday, April 29 in Modesto**

The **Dairy Together Roadshow** is coming to California and all dairy producers are invited to participate. **Dairy Together** is a nationwide effort to bring dairy producers around the

country together to forge solutions to the crisis dairy producers face due to chronically low milk prices that are well below production costs.

California Dairy Campaign is supporting a *three-point plan or a three-legged stool approach: fair milk prices, farmer-led inventory management and smart trade policy.* At the Dairy Together Roadshow we will join with dairy producers and leaders from around the country to determine the best way to restore profitability for dairy producers by working together to manage milk inventories to meet market demand. *All are invited to join us for a lunch meeting in Modesto on April 29, 2019.*

**The California Dairy Together Roadshow Event
is set to take place on
Monday, April 29 in Modesto at the
Stanislaus County Agricultural Center
3800 Cornucopia Way
12-2:30 p.m. Lunch Included
Please RSVP to Bertha Medina in the
California Dairy Campaign office
209-632-0885
or by email: cdc@californiadairycampaign.com**

Update on Dairy Together Roadshow Meetings Around the Country

PULL TOGETHER

**SUPPORT
FAMILY
FARMERS**

dairytogether.com

As the meetings for the Dairy Together Roadshow continue, it is evident that support for supply management is growing among dairy farmers across the country. The meetings are receiving widespread media attention because of the numbers of dairy farmers participating and the growing chorus of dairy producers who support fundamental change in U.S. dairy policy to enable dairy farmers to work

together to manage milk production to meet market demand and establish fair milk prices.

California Dairy Campaign is hosting a Dairy Together Roadshow event in Modesto on April 29 due to the strong support among CDC members for a comprehensive inventory management plan. CDC hosted a series of meetings in January and February of this year on the Canadian dairy supply management system and how it incorporates a three-legged milk policy stool to sustain dairy operations: farmer-led supply management, fair milk prices and smart trade policy. Dairy farmers in Canada are paid almost twice as much as dairy farmers in California and CDC and others in the Dairy Together movement are looking to the Canadian system as a model for fundamental change in US dairy policy to sustain dairy operations.

All dairy producers are invited to join us on April 29 for lunch in Modesto to talk about solutions to end the dairy crisis affecting dairy farmers in California and across the country who have been paid milk prices well below production costs for more than four years.
