

SABER

Single Automated Business Exchange for Reporting

Filling the
Information Gap

**A private sector initiative to create a single
means to exchange operations disruption
and restoration information**

SABER - Single Automated Business Exchange for Reporting The Problem – The Mission

Public Sector Operations Center

Government Operations Centers

Information Gap

The purpose of SABER is to be the single means for private sector organizations to deposit their operations disruption and restoration information to be shared with many authorized government agencies and other approved organizations.

SABER - Single Automated Business Exchange for Reporting

Public Sector Operations Center

A screenshot of a Microsoft Excel spreadsheet. The spreadsheet has columns for Site Number, City, State, Store/Store Status, Store Priority, Current Power Status, Generator Deployed, and Damage Level. The data is organized into rows, with some rows highlighted in blue. The spreadsheet is titled 'Worksheet1'.

Site Number	City	State	Store/Store Status	Store Priority	Current Power Status	Generator Deployed	Damage Level
2088	11 TAMPA	FL	CLOSED		No Power	Heavy	
1054	11 TAMPA	FL	CLOSED		No Power	Heavy	
1700	11 TAMPA	FL	CLOSED		No Power	Light	
1707	11 TAMPA	FL	CLOSED		No Power	None	
1044	11 TAMPA	FL	CLOSED		No Power	Medium	
1487	11 TAMPA	FL	REOPEN Regular Hour		Regular	None	
1345	11 TAMPA	FL	CLOSED		No Power	None	

Government Operations Centers

Information Gap

The Private Sector Has Outage, Closure, and Restoration Data in Formats as Varied as a Spreadsheet and as Sophisticated as Cloud Services, Some Portion of Which They will Share with Governments

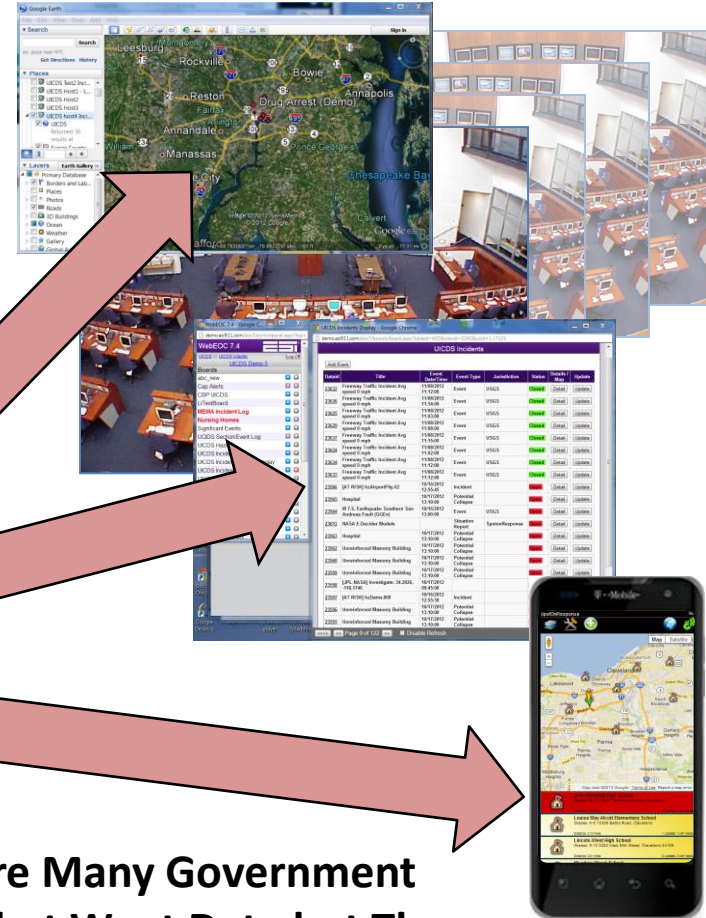

SABER - Single Automated Business Exchange for Reporting

Public Sector Operations Centers

The Private Sector Has Outage, Closure, and Restoration Data in Formats as Varied as a Spreadsheet and as Sophisticated as Cloud Services, Some Portion of Which They will Share with Governments

Government Operations Centers

There are Many Government Agencies that Want Data but They Have Many Different Systems to Receive Data which Presents Companies with Confusion and Unnecessary Burden

Information Gap

Public Sector Operations Centers

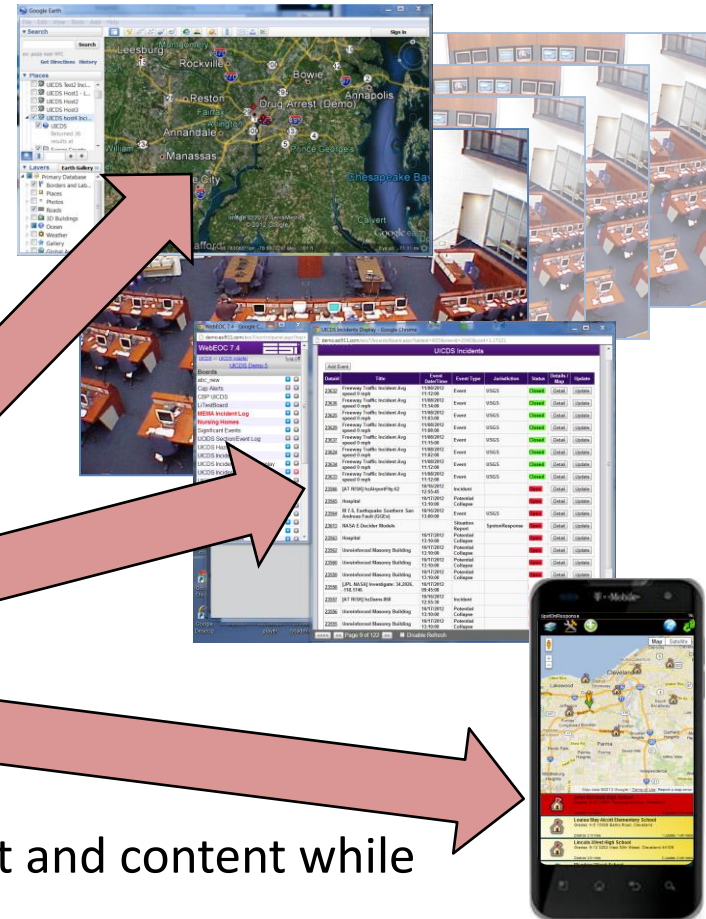

Site Number	Description	State	Store/Store Status	Store Priority	Current Power Status	Generator Deployed	Damage Level
2088	11 TAMPA	FL	CLOSED	Store Priority	No Power	Heavy	
1054	11 TAMPA	FL	CLOSED		No Power	Heavy	
1700	11 TAMPA	FL	CLOSED		No Power	Light	
2707	11 TAMPA	FL	CLOSED		No Power	None	
10444	17 TAMPA	FL	CLOSED		No Power	Medium	
1407	11 TAMPA	FL	REOPEN Regular Hour		Regular	None	
13465	11 TAMPA	FL	CLOSED		No Power	None	

The Goal

Filling The Information Gap

Government Operations Centers

- Let Private Sector data remain in its current format and content while following Private Sector operating procedures
- Do not make the Private Sector do double work by entering their data into another portal or application
- Give Private Sector data to approved government organizations in the NIEM standard format for use in their current applications

SABER - Single Automated Business Exchange for Reporting

Public Sector Operations Centers

The Solution

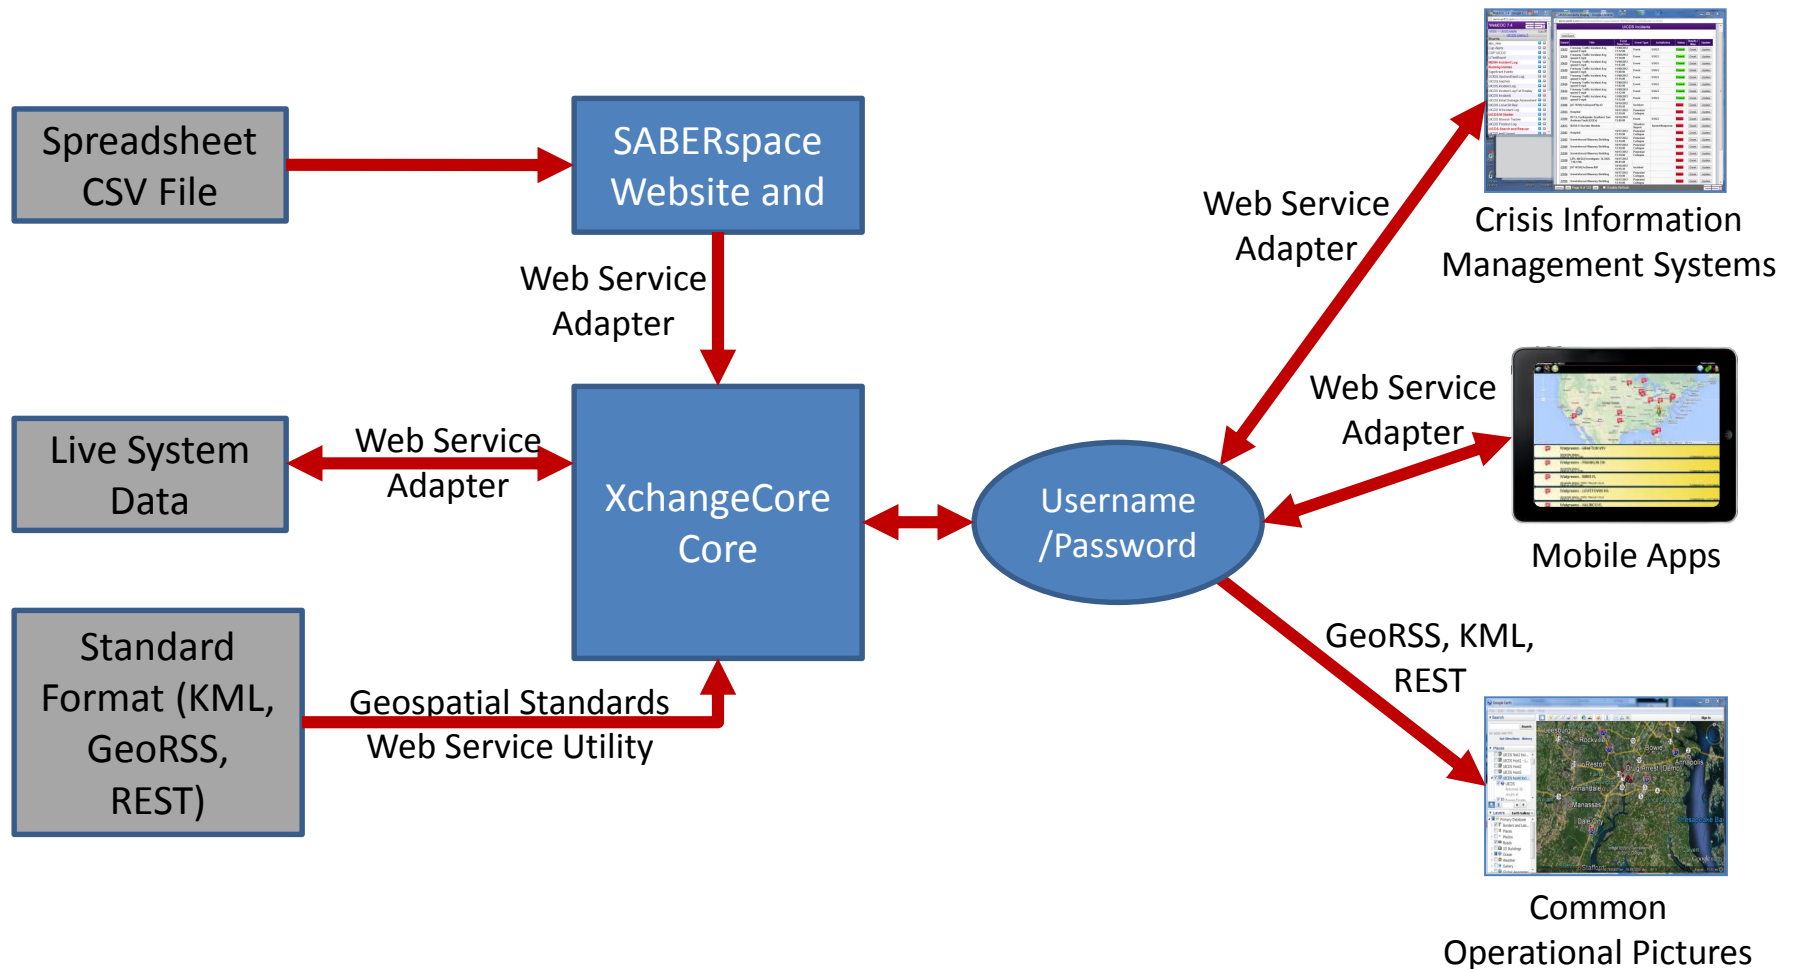

Government Operations Centers

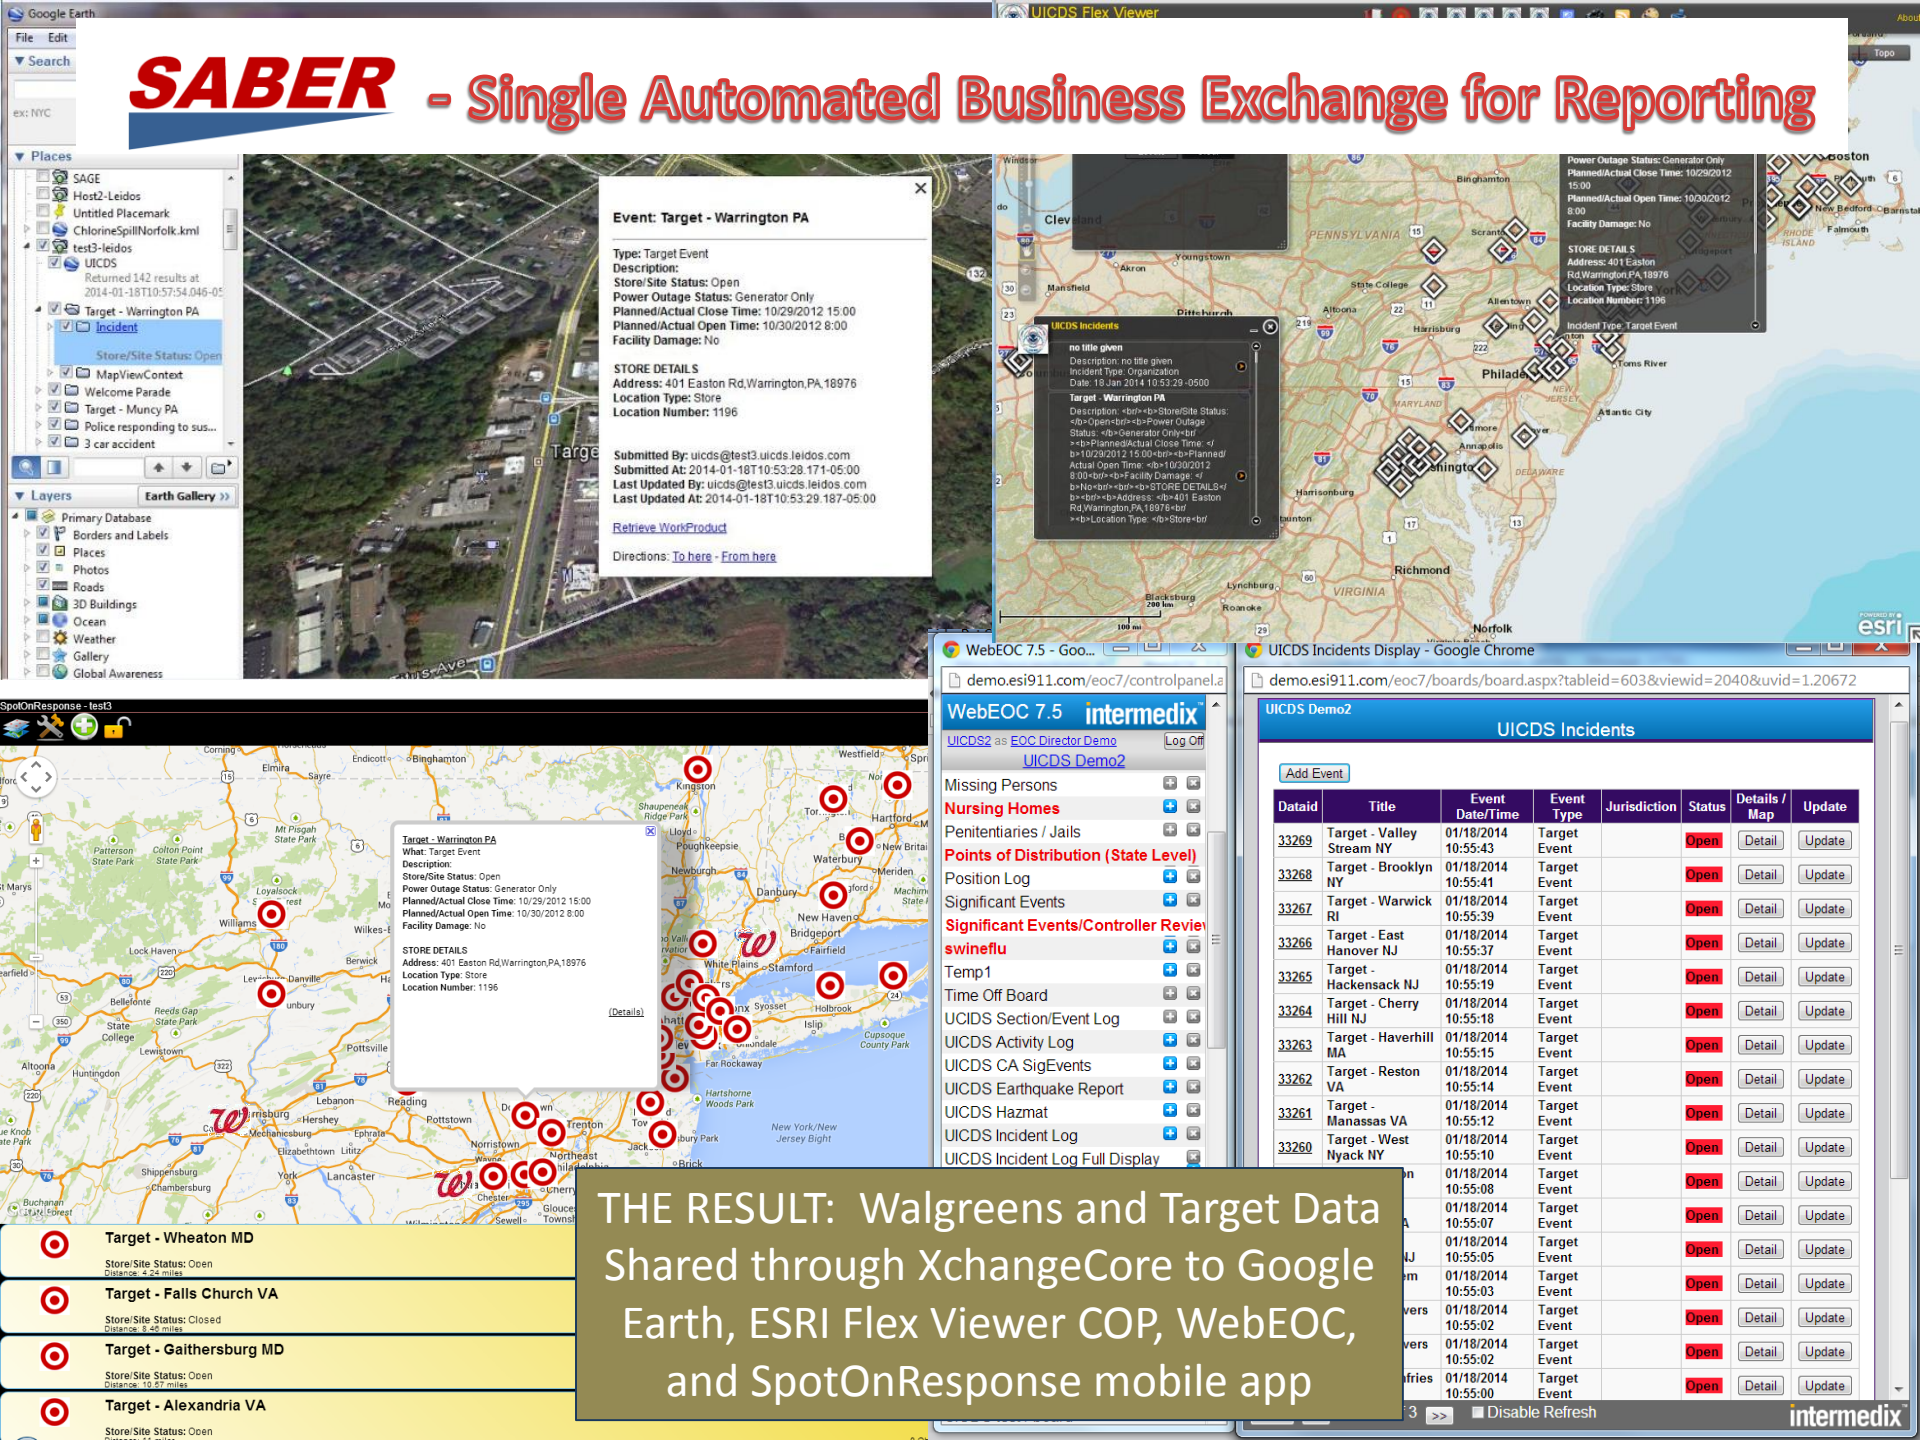

SABER is Built on the XchangeCore Middleware, Developed by DHS and Now Operated by a Not-For-Profit, Which is Fully Operational and Currently Deployed to Cut Across the Information Exchange Divide that Exists Between Public and Private Sector

SABER - Single Automated Business Exchange for Reporting

Technical Architecture – Currently Operational

SABER - Single Automated Business Exchange for Reporting

THE RESULT: Walgreens and Target Data Shared through XchangeCore to Google Earth, ESRI Flex Viewer COP, WebEOC, and SpotOnResponse mobile app

SABER - Single Automated Business Exchange for Reporting

Join Us in SABER ...

- The benefit to the private sector is that outage or closure information can be provided to a single sharing site rather than 50 states and many other entities requesting status information.
- The benefit to the public sector is that all private sector disruption and restoration information is consolidated in a single source rather than available from hundreds of organizations.
- The efficiency and effectiveness of this new, national approach will save time and money while avoiding gaps, overlaps, and inconsistencies in critical information.
